Dear Michelle Ascencion,

I am writing to you with deep concerns about the Voters Choice Act. The continued use of mail in ballots and unsecured drop boxes along with centralized ballot tabulation machines creates a privation of integrity. Same day voter registration should be removed for its inability to verify eligibility to vote. These methods, while intended to enhance accessibility and efficiency, unfortunately, also create easy opportunities for nefarious actors to engage in fraudulent activities.

As outlined in CA. Elections code 19101 Sec. B, it is imperative that our election system remains safeguarded from fraud and manipulation. However, numerous investigations and legal disputes across the country have exposed vulnerabilities in the security of ballot tabulation machines, contrary to the standards set forth in state law.

The following excerpts are from leading publications employing investigative journalists reporting on the insecurity of the vote tabulation machines.

The image shows a screenshot of a Breitbart article and a tweet. The article, titled "WATCH: FIRM DEMONSTRATES EASE OF HACKING A VOTING MACHINE", features a video player showing a voting machine screen with a "VOTE" button and the text "Thank you for voting. Your ballot has been counted." The tweet, by Frank Bergman, is dated November 8, 2023, at 10:55 am and includes a photo of a voting station with the sign "MARK YOUR BALLOT HERE". The tweet text reads: "A top executive from the company behind the voting machines that 'flipped votes' in Pennsylvania on Tuesday has admitted that 'Someone from our team programmed the election.'" The Breitbart logo and "SLAY" branding are visible at the top of the article screenshot.

## Wisconsin Cyber Security Expert Shocks Audience – Admits Wisconsin’s Voting Machines Can Be Hacked, Compares This to Act of War (VIDEO)

By Jim Hoft Mar. 31, 2023 10:15 am 208 Comments

Guest post by Jefferson Davis

**Pewaukee** – The Gateway Pundit reported earlier this week that the Wisconsin Election Commission and Staff were participating in a minimally publicized “Trusted Election Forum” on the eve of the most historic Supreme Court Race in Wisconsin’s history.

These accounts, along with numerous others, must not be dismissed as mere partisan conspiracy theories. Persistent investigations into irregularities concerning election ballot tabulation machines reveal glaring vulnerabilities that undermine their security and integrity, contrary to the mandates of state law. I urge you to reconsider our participation in the Voters Choice Act and to discontinue the use of these machines. Your failure to communicate on this matter demonstrates a lack of allegiance to your constituents.

As residents of Ventura County, we entrust our elected officials with the responsibility to uphold the integrity of our elections and to resist legislative measures that compromise transparency and violate constitutional principles. It is imperative that we prioritize the sanctity of our electoral process and take proactive steps to address these pressing concerns.

We insist that you give due consideration to the gravity of the issues raised and take appropriate action to ensure the integrity of our elections.

Respectfully,

Chuck Langley
