Good day, Supervisors!

I feel a need to correct something said at the last BOS meeting. And yes, this concerns the 9 year extension contract foisted up the electorate by some of the board members.

When questioned about the lack of public input on this particular item, a board member said there had been public discussion on this particular item. I would like to see the proof of that. Where are the videos showing public members talking about the 9 year contract extension for Dominion, where are the letters from the electorate on discussing the 9 year extension with one of the most corrupt companies in the world?

The electorate has been showing up at first asking that we change out the system, then asking for audits or other ways to prove to us the Dominion machines were secure and accurate. NO WHERE did we say let's add 9 more years to this grossly expensive piece of insecure, costly and corruptible system using propriety software that cannot be audited or proven to be accurate.

Since the public along with 2 of your own board members were not given enough time to look at the contract, read it, or discuss it, we will look into recourses to reverse the 3 person decision! When we cancel that contract, and we will, with or without your help, and if we get a hefty penalty, I believe the 3 who foisted this upon us should be liable to pay the penalty!

And thank you to those board members who showed us your true colors, who showed us that we the electorate do not need to be listened to. We will always remember this!

And yes, it was Chairwoman Supervisor Long who made the statement that the electorate had ample time to review and had opportunities to discuss. Did she misspeak? Or did she prevaricate? You decide!
