Dear Registrar of Voters,

Mrs. Michelle Ascension

I am writing to you with continuing profound concerns about the Sacramentos' **Voters Choice Act of 2016**. The legalized use of mail-in ballots, ballot harvesting, and unsecured drop boxes along with centralized ballot tabulation machines became deprived of integrity. Same day voter registration must be removed for its inability to verify eligibility to vote.

These reasons and others instill an optic of distrust in a process which is considered a sacred act in preserving our Republic.

At the last board meeting (Oct. 17, 2023), comments about transparency were a concern among the County Supervisors. I expect that your concern for **transparency** will be a focus for discussing a change back to One-Day elections.

This should be the highest fundamental priority of our elected officials. The County of Ventura should be an example to all counties demonstrating the highest standards.

I am urging the Ventura County Board of Supervisors to withdraw from the Voters Choice Act and go back to the **"One Day Polling Place Precinct Voting Model"** with paper balloting and hand counting. This is the way it was done successfully only a few short years ago.

Tabulation machines deprive the "People" to be witnesses in elections. This violates the People's basic Right of Suffrage and deprives the People of a guaranteed republican form of government.

We the people of Ventura County delegate to the County Board of Supervisors the

responsibility to stand against election processes legislated from Sacramento which removes full transparency and trust.

Respectfully,

Delilah Orloff
