

June 3, 2025

County of Ventura Board of Supervisors

**Subject:**      **Adoption of a Resolution Approving the Engineer's Report Concerning Vector Control Benefit Assessments, Confirming the Assessment Described Therein, and Authorizing the Levy of Vector Control Benefit Assessments for Fiscal Year 2025-2026.**

**Recommendations:**

Adopt the attached resolution approving the Engineer's Report (Exhibit 2), confirming the assessment described therein, and authorizing the levy of Vector Control Benefit Assessments for Fiscal Year 2025-2026 as set forth in the Engineer's Report.

**Fiscal Impact:**

	FY 2025-26
Revenues	\$ 1,663,490
Costs	\$ 1,663,490
Net County Cost	\$ -

Funding Source(s):      Annual Vector Control Benefit Assessment and related trust funds.

Match Requirement:      None

The appropriations and revenue associated with the proposed Vector Control Benefit Assessments are included in the proposed Resource Management Agency (RMA)-Environmental Health Division (Division) FY 2025-2026 Preliminary Budget. All costs and anticipated revenues associated with the Vector Control program are included in the table above to show full cost recovery, including indirect costs.

**Discussion:**

On May 6, 1986, after receiving consent from the cities, (with the exception of Moorpark), within Ventura County, your Board adopted the powers of a Vector Control District. This action was taken in response to an outbreak of mosquito-transmitted encephalitis in Southern California. The County Vector Control Program is administered by the Resource Management Agency (RMA) -

Environmental Health Division (Division). The primary functions of this program are reducing nuisances and the risk of vector-borne disease transmission through mosquito control, vector-transmitted disease surveillance, and vector-related complaint response. Approximately 2,400 mosquito breeding sources are routinely evaluated and treated with target-specific pesticides when evidence of mosquito breeding is observed. Controlling mosquitoes in this manner is cost effective and reduces human exposure to diseases such as West Nile virus, St. Louis encephalitis, western equine encephalitis, Zika, dengue, and malaria, as well as eliminating nuisance causing organisms.

The program is staffed year-round by six full-time employees. Extra help employees are utilized each year from April through October to augment mosquito control activities. Additionally, in consideration of emerging concerns over the invasive mosquito species that can carry the dengue virus, *Aedes aegypti* and *Aedes albopictus*, the Division will continue to increase its mosquito surveillance and public outreach efforts during the 2025-2026 mosquito season.

As a result of a July 2004 Proposition 218-compliant ballot measure of Ventura County property owners, vector control costs have been fully funded by the annual assessments authorized by your Board each fiscal year in accordance with provisions of the California Constitution, Articles XIII C and XIII D (Proposition 218). The voter pamphlet accompanying the 2004 ballot allows for "an annual adjustment tied to the change in the Los Angeles Area Consumer Price Index (CPI), not to exceed 3% per year." Consistent with the 2004 resolution and the typical interpretation by districts in California, your Board has interpreted this language to allow a maximum assessment in any year up to the cumulative change in the CPI since 2004 (not to exceed 3% per year). In other words, a decision not to authorize the maximum allowable assessment in one year does not affect the maximum allowable assessment in future years. For Fiscal Year 2024-2025, your Board adopted a resolution authorizing the levy of the Vector Control Benefit Assessment at a rate of \$6.51 per single family equivalent (SFE) unit.

As part of the annual review of the assessments, it is now time for your Board to consider setting the Vector Control Benefit Assessment rate for Fiscal Year 2025-2026. Accordingly, the attached Engineer's Report (Report), describes the Vector Control Program services, projected program costs, and recommended assessment rate. The Report was prepared by SCI Consulting Group and is included as Exhibit 2 to this Board Letter.

The actual Southern California (*Los Angeles-Long Beach-Anaheim, CA*) CPI increased 3.424% during the previous year, the Report recommends a proposed 3.0% increase in the annual benefit assessments for Fiscal Year 2025-2026 to cover program costs. Based on an annual maximum CPI adjustment not to exceed 3% per year since 2004 and considering the 3.424% CPI increase as well as the potential use of excess CPI of 9.79% banked from this year and previous years, the assessment rate for Fiscal Year 2025-2026 can be as high as \$6.70 (which is a 3% increase) per SFE. As noted in the Report, through the implementation of ongoing cost saving strategies and prudent management of monies held in the Vector Control Benefit Assessment Trust Fund, there are funds in the trust to offset a portion of the projected costs for Fiscal Year 2025-2026 while still maintaining an adequate reserve.

Therefore, to offset the projected costs, the Division recommends increasing the current assessment rate to \$6.70 per SFE, (which is an increase of \$0.19 cents per SFE per year) in combination with \$7,000 in penalties and investment income, resulting in an estimated net assessment amount of \$1,634,298. Revenue held in the Vector Control Assessment Trust in the

amount of \$22,193 will be utilized to cover the slight offset between projected expenditures and projected assessment revenues of \$1,663,490. (An excerpt from the Report entitled Estimate of Costs; includes the proposed assessment, and this excerpt is included as Exhibit (3). The recommended actions will (1) expend funds held in trust for their intended purpose, and (2) fully cover costs related to vector control services during the coming fiscal year.

To set the assessment rate as recommended, it is necessary for your Board to adopt the attached resolution approving the Engineer's Report, confirming the assessment described therein, and authorizing the levy of the assessment at the rate set forth in the Engineer's Report.

**Strategic Plan:**

This is in line with the County of Ventura's Strategic Plan, Healthy, Safe, and Resilient Communities, Goal (2) Maintain high-performing public safety services.

**Reviewing Agencies:**

The County Executive Office, Auditor-Controller's Office, and County Counsel have reviewed this matter.
