Dear Board of Supervisors,

As a lifelong resident I am concerned about all issues of health as it relates to air pollution and green house gas emissions resulting in climate change.

Agenda Item # 65

Please approve this policy proposed by the VCCEC, our County Government needs to start leading by example.

Agenda Item #66

It is outrageous to me that we would change the already adopted County General Plan, which is forward thinking and provides protections to all of our residents.

Do not cave in to the Oil Industries, they do not have our health as their interest.

Do not change the General Plan as it pertains to the setback protections, flaring of oil wells, or transport by truck.

Thank you

Allison Maires
