**Discussion:**

Senate Bill 1953, which was signed into law on September 21, 1994, mandated the establishment of regulations for seismic safety for hospitals. One of the main provisions of SB1953 is the development of seismic performance categories, specifically the Structural Performance Category (SPC) and the Nonstructural Performance Category (NPC). The Department of Health Care Access and Information (HCAI), previously known as Office of Statewide Planning and Health Development (OSHDP), established that hospitals and related buildings shall meet minimum SPC and NPC ratings by 2030. VCMC buildings currently do not meet the minimum NPC-5 rating. The NPC-5 requirements relate to the ability of the hospital facility to support 72 hours of emergency operations for electrical, mechanical, sewer, and water utilities.

The VCMC buildings included in this project are the North Tower/ HRW, South Tower/ Fainer, Lab/Kitchen, Cafeteria, and the inpatient psychiatric unit. This Project must be completed and approved by HCAI prior to January 1, 2030.

This initial contract includes preliminary design services to define the full scope of the Project. The consultant will analyze the electrical, mechanical, water, and sewer utilities and develop proposed upgrade plans to achieve the NPC-5 requirements. Once this preliminary design is complete, we will be able to estimate the total Project cost. As the Project moves forward, VCMC will evaluate funding options and return to your Board for approval.

PWA requests that the consultant services contract (Exhibit 2) be approved by your Board. The contract has been negotiated with Rasmussen & Associates of Ventura, CA in accordance with the policy adopted by your Board on November 3, 1998. The contract is on a standard form previously reviewed by County Counsel.

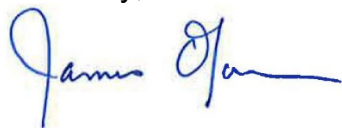

A vicinity and location map has been included as Exhibit 1.
