Good morning,

We need to unite. You are convinced that there is no fraud. We on the other hand have witnessed it and heard many accounts of fraud and also seen the results of elections and recalls. We KNOW there is fraud. We read and see reports of fraud using the same systems across the US. We understand you are not allowed to believe that or accept it. You must tow the line.

You would like us to go away and I have a great idea. Give us a nugget. Prove to us that it is not fraudulent. How? Give us a 100% hand count audit or 99%, 75% or even 50%!!! 1% does not even cover statistical errors, it's ridiculous! So nothing under 50%. And citizen observers to watch all stages of the audit. If you are correct, then this will prove you are correct.

Otherwise, we will be sticking around and watching everything that affects the cities in our county and our county. We trusted all of you and found our trust betrayed. Show us you have our backs. Give us the manual audit.

And if you don't do this, what will that say about you? And what will that tell us? Which side of history do you want to be on?

Julieanne Case
