Supervisors,

Transparency is an absolute requirement when dealing with any for profit over any other concern corporations especially BIG OIL Corporations who know that their products and business models are antithetical to our planet's dire climate crisis.

The **“when feasible” clause** in the proposed Agreement will result the the dissolution of meaningful environmental regulations under it. **“When feasible” to a for profit at all costs corporation means NEVER.** The historic business model is to take all profit from an acquirable resource and then let all remediation costs for damage to **our** environment and **our health and that of this planet be abdicated to the public once the business has achieved its feasible profit making from the source.**

**I urge you to VOTE NO on Item 66.**

Sincerely,

Maria Elena Ramirez  
Ventura, CA 93001
