Item 36

Dear Supervisors:

Please keep our elections safe, secure, and accurate. Approve the contract amendments which provide for equipment and security upgrades and extend the term of agreement with Dominion Voting Systems. Dominion products have been in use nationwide, are proven reliable, and won \$7 million in the lawsuit of defamation against them.

Do not succumb to the false claims of election fraud that have been debunked time and time again. The machines are tested for accuracy and re-checked against manual tally audits every election. The demand for not using election machines and instead hand-counting is a red herring designed to break our election process. Hand-counted elections would not be accurate, safe, or secure. They would drastically slow the tabulation process, increase the likelihood for errors, and break the state law prohibiting hand counting in elections in counties of our size.

Please show your support for democracy by continuing our current contracts for safe, secure, and accurate voting machines.

Sincerely,
Randall Edwards
Thousand Oaks
