Re: Support for Karl's Development at Fisherman's Wharf, Channel Islands Harbor

To whom it may concern:

We live within a stone's throw of the proposed development at Fisherman's Wharf in Channel Islands Harbor.

While at first skeptical of the plans as originally presented, the Karl's development has morphed in to the type of operation that could benefit both the region and local residents alike. They have taken the time to provide opportunities for the local residents to provide feedback with respect to their concerns.

Karl's receiving their lease is an important step in their moving forward with their plans. Once this happens, clearly, continued oversight will be placed on them to ensure that their development follows along the lines of the plans that have come in to being today.

We support the Karl's development at Fisherman's Wharf and look forward to seeing come in to fruition.

Thank you to Harbor Director Michael Tripp for his work in securing new development in Channel Islands Harbor

Respectfully Submitted,

David and Shereen Flamer
