---

Dear Board of Supervisors,

I strongly recommend the approval to purchase the highly effective immunization Nirsevimab to protect our children from RSV. This investment is cost-effective by preventing emergency care visits and hospitalizations. The immunization, which is currently recommend by the CDC for all babies less than 8 months of age, has been proven to prevent severe RSV disease, which as a family physician I have seen way too often while serving in our county facilities for the last 15 years.

**Carlos O'Bryan, M.D., FAAFP**
