LOCATION:

PARKING LOT B (see map)

CORNER OF SOUTH ROSE AVE AND EAST BARD ROAD  
(ENTER ON ENTRANCE ROAD)

4000 S Rose Ave, Oxnard, CA 93033

## 2024 ARRL Field Day — June 22 – 23

Ham radio operators from the Ventura County Amateur Radio Club in Ventura County will be participating in a national amateur radio exercise from 11 AM on Saturday until 11AM on Sunday, June 22 – 23. The event is [ARRL Field Day \(www.arrl.org/FieldDay\)](http://www.arrl.org/FieldDay), an annual amateur radio activity organized since 1933 by ARRL, The National Association for Amateur Radio in the United States.

Hams from across North America ordinarily participate in Field Day by establishing temporary ham radio stations in public locations to demonstrate their skill and service. Their use of radio signals, which reach beyond borders, bring people together while providing essential communication in the service of communities. Field Day highlights ham radio's ability to work reliably under any conditions from almost any location and create an independent, wireless communications network.

Some hams from Ventura County will also use the radio stations set up in their homes or taken to their backyards and other locations to operate individually or with their families. Many hams have portable radio communication capability that includes alternative energy sources such as generators, solar panels, and batteries to power their equipment.

This year's event is also noteworthy given that a particularly active fire season is predicted. "Hams have a long history of serving our communities when storms or other disasters damage critical communication infrastructure, including cell towers," said Dave Schmidt, President, VCARC, call sign AI6VX. "Ham radio functions completely independently of the internet and phone systems and a station can be set up almost anywhere in minutes. Hams can quickly raise a wire antenna in a tree or on a mast, connect it to a radio and power source, and communicate effectively with others," Schmidt added.

During Field Day 2021, more than 26,000 hams participated from thousands of locations across North America. According to ARRL, there are more than 750,000 amateur radio licensees in the US, and an estimated 3 million worldwide.

Among the tenets of the Amateur Radio Service is developing and practicing skills in radio technology and radio communications, and even contributing to international goodwill. Hams range in age from as young as 9 to older than 100. A self-study license guide is available from ARRL: [The ARRL Ham Radio License Manual \(www.arrl.org/shop/Ham-Radio-License-Manual\)](http://www.arrl.org/shop/Ham-Radio-License-Manual) and for Kindle (<https://read.amazon.com/kp/embed?asin=B07DFSW94G>). For more information about ARRL Field Day and ham radio, contact Dave at [president@vcarc.club](mailto:president@vcarc.club) and visit [www.arrl.org/what-is-ham-radio](http://www.arrl.org/what-is-ham-radio).
