Dear Board of Supervisors,

This proposed settlement sellout puts our climate and health at risk as it allows Oil companies to self-regulate by changing the key provisions of environmental protections from "MUST" to "WHEN FEASIBLE", making the rules useless!

When the Rincon Island restoration and oil well capping project became "not feasible for the oil companies" they declared bankruptcy and walked away. But, somehow the project became feasible when we the taxpayers were footing the bill.

Please defend our 2040 General Plan to help correct some of the damage that has been done over the years.

We all are responsible for the protection of our environment and the climate. I urge the entire Board to (including my representative Kelly Long) to:

**Vote NO on Agenda Item 66**

Thank you,

Gordon Henry
