

Exhibit 1:

Ventura County Health Care Agency Ambulatory Care would like to thank the Lions Club District 4-A3 clubs listed below for their efforts to support the matching grant from Lions Clubs International Foundation totaling \$200,000. These funds will help to enhance patient care in treatment of Diabetes Mellitus in the County of Ventura. We would also like to thank Driscoll's for attending the January 2023 Ribbon Cutting for the original \$200,000 worth of vision equipment at Las Islas Clinic raised by District 4-A3 in a prior LCIF Matching grant. Driscoll's witnessed local Lions Clubs continued dedication to vision and diabetes and matched District 4-A3's funds through Driscoll's Giving Fund for this current round of funding to stand by these clubs and their dedication. This has been an exemplary example of the heart of our Ventura County community and the desire to have high quality care close to home for a prominent disease in our region, diabetes.
