Re: Support for the Denial of the Appeal of Case PL 14-0103 (Renaissance Petroleum)

Dear Chair Onstot and Commissioners,

Ventura County CoLAB is a business advocacy organization representing over 450 members countywide. We are very concerned about the number of groundless appeals filed against relatively minor oil and gas projects and the impacts to County staff and budgets. The projects being appealed represent the maturity of the oil industry in Ventura County, requiring necessary upgrades to facilities for safety and new wells to curb the natural decline of oil production over time.

The decline in oil production has consequences for California considering that crude oil is the main feedstock for transportation fuels. According to the California Energy Commission (CEC) there are 30 million registered on-road vehicles in California and in 2016 sales of gasoline reached over 15 billion gallons. This marks a steady increase in gasoline consumption since 2013.

While fuel consumption increases, statistics from the State Division of Oil and Gas (DOGGR) show that California's crude oil production continues to decline, a 22% reduction since 2007. As there are no crude oil import pipelines into California, imported oil from other states and countries must travel to California by tanker vessels into ports in the Los Angeles and San Francisco areas to meet the demand for our transportation lifestyle.

In 2016, California imported over 328 million barrels of oil, 54.5% of the total crude oil we consume annually (per the CEC). The decline in both Alaska and California oil production has not stemmed the demand for gasoline causing foreign imports of crude oil to accelerate.

Shockingly, the top seven countries supplying crude oil to California refineries are Saudi Arabia, Ecuador, Colombia, Kuwait, Iraq, Oman, and Angola (per the CEC). The average time for an oil supertanker to deliver crude oil products across the ocean from Middle Eastern countries is 40 days.

From the perspective of global climate change, it is critical that Ventura County support the production of local oil to keep up with supply demands and reduce our dependence on foreign oil. Environmental advocacy should be focused on ways to reduce the demand for gasoline rather than appealing local production projects. Every single barrel of oil not produced in Ventura County causes more tanker traffic across our oceans.

CoLAB believes that the energy future in California depends on the well managed production of local oil reserves within the state, including Ventura County. We commend the Ventura County Planning Division for their thorough analysis of the environmental impacts of the Renaissance Petroleum project based on the California Environmental Quality Act and their approval of the Modified Conditional Use Permit.

We recommend that the Planning Commission deny the appeal of Project PL 14-0103.

Sincerely,

A handwritten signature in black ink, appearing to read "Lynn Gray Jensen". The signature is fluid and cursive, with the first name "Lynn" being the most prominent.

Lynn Gray Jensen

Re: Renaissance Petroleum Project, Case No. PL14-0103

Dear Mr. Onstot,

The Sept. 7 public hearing on the project referenced above (Agenda Item 7) likely will be a contentious one, thanks to the crowd-mobilization efforts of the appellants, Citizens For Responsible Oil and Gas (CFROG) and Food and Water Watch. Farm Bureau of Ventura County is aware that these critics of the Renaissance Petroleum well field expansion have encouraged public opposition by, among other things, citing its supposed incompatibility with agriculture. Some have gone so far as to portray it as a threat to nearby farming.

We see no evidence in the record to support that assertion. Farming and oil extraction have occurred side by side in Ventura County for decades, with no adverse effect on agricultural production or operations. In many cases, income from oil leases has enabled owners of that property to farm the remainder more effectively by providing resources for expansion and crop diversification. This makes it a contributor, not a detriment, to agricultural viability.

Farm Bureau is as concerned as any organization or individual about potential contamination of local groundwater basins by oil and gas extraction. Our members are almost wholly reliant on those basins for their livelihoods. But rigorous safeguards are already in place to protect groundwater from petroleum production, and the quality of groundwater beneath the Oxnard Plain is extensively monitored by multiple agencies and regulatory bodies. There is no evidence of such contamination, indicating the safeguards work.

Sincerely,

John Krist
Chief Executive Officer

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

RE: Case No. PL14-0103, Renaissance Petroleum Permit Modification

Dear Chair Onstot and Commissioners:

This letter is to express my support of the Conditional Use Permit modification application filed by Renaissance Petroleum and to oppose the appeal of the Ventura County Planning Director's approval of the Minor Modification on April 3, 2017.

The staff report for this item states that, "Planning Division staff have not identified any new potentially significant impacts, or any increase in severity of a previously-identified significant impact, associated with the proposed project that warrant major revisions to the Mitigated Negative Declaration (MND). Thus, staff recommends that the Commission find that no subsequent or supplemental EIR is required for the proposed project, and the MND Addendum is the appropriate document to satisfy the environmental review requirements of CEQA."

The staff report also states, "The assertions made by the Appellants are general in nature and do not identify any specific violation committed by the Planning Director."

It appears the appeal is unfounded and could be deemed frivolous.

Thank you for your consideration to deny the appeal and support the permit modification.

Sincerely,

Fred J. Ferro, V.P.

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)

Dear Mr. Onstot:

I work in the oil industry in Ventura County. I am employed by a service company that frequently services wells for Renaissance Petroleum, LLC (RenPet). It has come to my attention that the subject approved permit modification is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The oil and gas industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. In my opinion the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

RE: Appeal of Renaissance Petroleum Permit Modification
Case No. PL14-0103

Honorable Chair Onstot and Commissioners,

This letter is to support the Ventura County Planning Director's approval of Minor Modification of CUP LU05-0086 for Renaissance Petroleum, and to oppose the appeal of that decision.

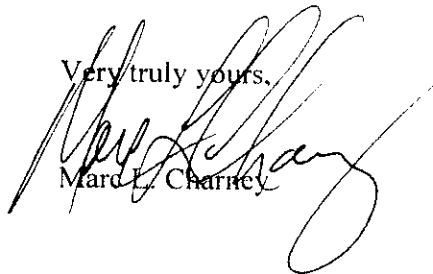

As is stated in the staff report for this matter, Planning Division staff have not identified any new potentially significant impacts, or any increase in severity of a previously-identified significant impact, associated with the proposed project that warrant major revisions to the Mitigated Negative Declaration (MND).

Also per the report, staff recommends that the Commission find that no subsequent or supplemental EIR is required for the proposed project, and that the MND Addendum is the appropriate document to satisfy the environmental review requirements of CEQA.

The appeal filed by Citizens for Responsible Oil and Gas and Food & Water Watch appears to be a frivolous attempt to block production of energy resources we all depend on every day.

I respectfully request that you deny the appeal and grant the Minor Modification.

Very truly yours,

Marc L. Charney

RE: Case No. PL14-0103
Renaissance Petroleum Permit Modification

Dear Chair Onstot and Commissioners:

This letter is to support the Conditional Use Permit modification application filed by Renaissance Petroleum, and to oppose the appeal of the Ventura County Planning Director's approval of the Minor Modification on April 3, 2017.

The staff report for this item states that Planning Division staff have not identified any new potentially significant impacts, or any increase in severity of a previously-identified significant impact, associated with the proposed project that warrant major revisions to the Mitigated Negative Declaration (MND).

In addition, staff recommends that the Commission find that no subsequent or supplemental EIR is required for the proposed project, and the MND Addendum is the appropriate document to satisfy the environmental review requirements of CEQA.

Finally, the staff report states, "The assertions made by the Appellants are general in nature and do not identify any specific violation committed by the Planning Director."

I ask that you deny the appeal and support the permit modification.

Sincerely,

F. Steven Buenger

RE: Renaissance Petroleum Permit Modification
Case No. PL14-0103

Dear Chair Onstot and Commissioners:

This letter is to express my support of Renaissance Petroleum's Minor Modification of Conditional Use Permit LU05-0086.

Oil and gas operations are amongst the most highly regulated in our state and in our nation. As is the case with existing wells on the Cabrillo Oil Field, the proposed wells will be in accordance with the rules and regulations of the California Department of Conservation, Division of Oil and Gas and Geothermal Resources (DOGGR).

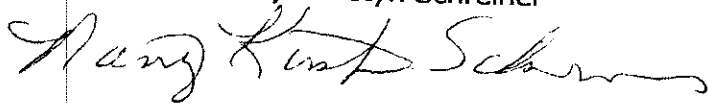

In addition, the professional staff of the Ventura County Planning Division has not identified any new potentially significant impacts, or any increase in severity of a previously-identified significant impact, associated with the proposed project.

Staff recommends that the Commission find that no subsequent or supplemental EIR is required for the proposed project, and the MND Addendum is the appropriate document to satisfy the environmental review requirements of CEQA.

In my professional opinion, the appeal filed by Citizens for Responsible Oil and Gas and Food & Water Watch should be denied and the Minor Modification approved.

Sincerely,

Law Offices of Nancy Kierstyn Schreiner

RE: Appeal of Permit Modification PL 14-0103, Renaissance Petroleum

Dear Commissioners,

This letter is to voice my opposition of the appeal of the permit modification for the Cabrillo Oil Field located in the southern portion of the Oxnard Plain.

I have much confidence in the professional staff of the Ventura County Planning Division. I believe they thoroughly reviewed the permit modification for compliance with all laws of the state of California.

The appeal by Citizens for Responsible Oil and Gas (CFROG) and Food & Water Watch (FWW) is baseless. They claim there is some unfounded bias because the oil field is near South Oxnard. Ventura County's history is rich with oil and gas extraction. No one claimed "environmental injustice" fifty years ago when the oil and gas industry was a mainstay in western Ventura County. I ask that you deny the appeal.

Sincerely,

Mark Spellman

RE: Appeal of Renaissance Petroleum Permit Modification, Case No. PL14-0103

Dear Chair Onstot and Commissioners:

The number of regulations the oil and gas industry must comply with in California is enormous and the number of agencies regulating the industry is over twenty. Those regulations are in place to assure safety for workers and residents alike, and to protect our environment.

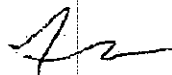

If all regulations are met, local government has the duty to issue or modify permits pertaining to oil and gas operations. This was the case with the permit modification for the Cabrillo Oil Field. Ventura County staff followed CEQA Guidelines and Ventura County's Non-Coastal Zoning Ordinance before granting a permit modification.

The appeal of the Renaissance Petroleum permit modification by Citizens for Responsible Oil and Gas (CFROG) and Food & Water Watch (FWW) is meritless. Their claim of environmental injustice is not supported by facts. The Planning Commission Staff Report says, "The assertions made by the Appellants are general in nature and do not identify any specific violation committed by the Planning Director." The environmental injustice is taking away good jobs from those who now have a path to the middle class.

In addition, the amount of tax dollars being wasted on these frivolous appeals is absurd and backing up the system for all.

I ask that you deny the appeal and approve the permit modification.

Sincerely,

Tom Baldonado

RE: Appeal of Permit Modification, Renaissance Petroleum
Case No. PL 14-0103

Dear Commissioners:

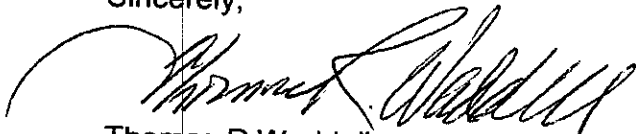

This letter is to voice my opposition of the appeal of the permit modification for the Cabrillo Oil Field located in the southern portion of the Oxnard Plain.

One of the appellants, Citizens for Responsible Oil and Gas (CFROG), has developed quite a record for appealing every decision regarding fossil fuels made in Ventura County over the last several years. Fortunately, their success rate is dismal at best.

Once again, the appeal filed for the Renaissance Petroleum project appears to be baseless. In fact the Planning Commission Staff Report says, "The assertions made by the Appellants are general in nature and do not identify any specific violation by the Planning Director."

The applicant will be subject to all rules and regulations of the California Department of Conservation, Division of Oil and Gas and Geothermal Resources (DOGGR). The project does not utilize any hydraulic fracturing or other well stimulation treatments. I ask that you deny the appeal and approve the permit modification.

Sincerely,

Thomas R Waddell

RE: Appeal of Permit Modification PL 14-0103
Renaissance Petroleum

Dear Chair Onstot and Commissioners:

I am opposed to the appeal of the permit modification for the Cabrillo Oil Field located in the southern portion of the Oxnard Plain. The oil and gas industry is the most regulated industry in the state of California. The professionals in the Ventura County Planning Division have assured compliance of the drill sites with all applicable laws.

I believe the appeal by Citizens for Responsible Oil and Gas and Food & Water Watch is groundless, and I ask for your denial.

Thank you for your consideration.

Sincerely,

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. My home is just over 500 feet west of the Naumann Drillsite. My home is the closest residence to the Naumann Drillsite. My home is 1000 feet southeast from the city limits of Oxnard. Be advised that I do not hear or smell anything associated with the activities at the Naumann Drillsite. I occasionally see the flare in operation. With the volume of truck traffic already traveling Etting Road, two additional trucks per day is insignificant.

RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017. Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**Re: Appeal of Approved Permit Modification Case Number PL 14-0103
(Renaissance Petroleum, LLC)**

Mr. Onstot:

I am a Ventura County resident. The oil industry has a long, safe, mutually profitable history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. I looked over the paperwork with the application and county responses. It appears to be in compliance with all local, state and federal regulations. Ventura County tends to err on the side of environmental safety.

The appeal has no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. Please do the same- deny the baseless appeal.

Regards,
George Miller

RE: Renaissance Petroleum Permit Modification, Case No. PL14-0103

Chair Onstot and Commissioners:

This letter is to express my support of Renaissance Petroleum's application for a permit modification and to oppose the appeal filed against the project.

I believe the Planning Commission Staff Report speaks for itself on this project. It is clear that the operator wishes to improve the Cabrillo Oil Field. As is required by California law, all of the drilling, completion, and production operations must be conducted in accordance with the rules and regulations of the California Department of Conservation, Division of Oil and Gas and Geothermal Resources.

The permit modification does not seek to incorporate hydraulic fracturing or other well stimulation techniques. The applicant has also agreed to implement a fluid truck transport limit and restrict truck traffic to only a segment of Etting Road east of the Naumann lease facility.

The Staff Report states the modification request satisfies the environmental requirements of CEQA with a Mitigated Negative Declaration Addendum, since Planning Division staff has not identified any new potentially significant impacts associated with the project.

Regarding the appellants, CFROG has developed a track record of appealing nearly every oil and gas ruling made in Ventura County since their inception in 2013. The fact that they have lost every appeal to date indicates their claims are meritless.

Thank you for your consideration to deny the appeal and support the permit modification.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Tom Cady', is written over a light blue horizontal line.

Tom Cady, President

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**SUBJECT: Ventura County Zoning Clearance Appeal Hearing Letter of Support
Carbon California Company Item ZC16-1072**

Dear Mr. Onstot:

I am a Ventura County resident who recognizes the important role the oil & gas industry plays in the local economy and to the lives of many families who live and work here. In looking at the project being considered for Carbon California, I fully support the zoning clearance and urge you to deny appeal and vote in favor of this project moving forward.

I understand that this project has already been approved and supported by the Ventura County Planning Commission and the Board of Supervisors.

Sincerely,

Signature:

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

SUBJECT: Appeal of Approved Permit Modification

Case Number PL 14-0103 (Renaissance Petroleum, LLC)

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

SUBJECT: Appeal of Approved Permit Modification Case Number PL 14-0103 (Renaissance Petroleum, LLC)

Dear Mr. Onstot:

I am a Ventura County resident, we live in the City of Oxnard and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. We can't afford to lose any other industry and jobs in our area. My professional experience calls me to reach out to you in support of this effort. We need you to take action immediately and ACT appropriately towards and support the approval and reject the appeal made. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal. We definitely need change and we need the support of the people that have the correct and reliable information for the citizens of Ventura County.

I urge you to consider this immediately.

Best Regards,

Gloria Massey Chinae

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

To: Hall, Anna
Subject: Project #PL14-0103 - Oppose Request for Study

Dear Ms. Hall and Planning Commission Members –

As a Ventura County oil and gas operator with employees that reside in the County, we urge you to reject the unfounded demand by Food & Water Watch and CFROG for a cumulative impact study for the Renaissance Petroleum expansion of the Cabrillo Oil Field. Unfortunately, through extensive experience interacting with Food & Water Watch, we know them to deliberately disseminate misleading information in an effort to scare the public and shame officeholders into supporting their positions. A perfect example is the map being used by them showing many more wells in the Oxnard and Cabrillo Fields than are actually there. The majority of those wells are now abandoned. They do this deliberately to stir up concern. Instead of acting in the best interest of the public, they are only interested in their cause – shutting down oil and gas production in California and putting tens of thousands out of work.

By acquiescing to the whims of outside groups focused on stopping an economic activity they disagree with, the Planning Commission could create an atmosphere of uncertainty for all businesses in the County. If opponents of oil and gas can do this, what is stopping them from targeting agriculture or housing?

In conclusion, Renaissance Petroleum went through the appropriate permitting process, is proposing a small increase in its operations, is far removed from sensitive receptors, and poses no threat to the greater environment. We urge you to stand by the approved permit and support Renaissance Petroleum.

Thank you for your time.

Sincerely -

Ralph Combs | Manager of Regulatory,
Community, and Government Affairs
The Termo Company

Petition in Support of CFROG and Food and Water Watch Appeal

We are residents of Ventura County and support the appeal of the Renaissance Petroleum expansion project at the Naumann and Rosenmund Drill Sites in the Cabrillo Oil Field at Etting Road. Ventura County must abide by all Environmental Justice laws and tenants and put public health ahead of economic gain.

The residents of the community around the project already are burdened by pollution and any further impacts, certain and potential, must be accounted for in the project analysis. (Project #PL14-0103)

Address 526 Abbe Dr. More #

Subject: Re: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Ms. Hall,

I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do their duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is **site specific**, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

Subject: Proposed oil and gas project

Re: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Ms. Hall,

I have lived in Ventura county and moved to Oxnard in 1953. I have watched the area grow and have seen many instances of development that break my heart. Public health and safety should never come at the expense of the citizens who live and pay taxes in a community.

I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do their duty and put public health **ahead of private business interests** by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is **site specific**, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

Sincerely,
Susan Chapin

Subject: PL14-0103

Dear Planning Commissioners,

Why do communities of color and lower income get stuck with more pollution?

Because a full evaluation of impacts is passed over.

Mitigation can improve the lives of our friends and family and its your job to make sure that happens.

I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do its duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific.

Thank you,

John Brooks

To: Isabel Ramseyer <bellaram2@gmail.com>

Hello Isabel --

We need your comments emailed to Ventura County NOW in support of our appeal.

CFROG and Food & Water Watch have appealed [an oil and gas project in South Oxnard](#) to compel the county to fully assess and consider the health impacts to the disadvantaged community near the project. Our appeal hearing before the Ventura County Planning Commission is set for Thursday, September 7 at 8:30am. [RSVP to the hearing here.](#)

We need YOU to email your comments in SUPPORT OF THE APPEAL to the county as soon as possible.

Can you do it right now? (Must be send before Sept. 6) Here's how -

Send email to Anna Hall, Clerk for the Ventura County Planning Commission, anna.hall@ventura.org
Here is a sample comment:

Re: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Ms. Hall, I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do their duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

As of right now the county has 324 letters in support of the project - we hope to counteract that with our 2000 petition signatures AND YOUR written comments. Please send BEFORE Sept 6.

Thank you for speaking out for #EnviroJustice For Oxnard

Subject: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Ms. Hall,

I am writing as a biologist, mother and Ventura County resident in support of the appeal of PL14-0103 and to ask the Planning Commission to do its duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

I have long followed and remain very concerned about impacts to our County air and water resources from local oil and gas extraction and disposal activities, specifically as they relate to hydraulic fracturing. Clean air & water is essential to both life and health. As such, I urge Ventura County leaders not to wait to ensure the protection of our groundwater until after it has already been compromised by petrochemical drilling activities, toxic wastewater injection wells and sumps. Please protect our community's families NOW ... BEFORE irreparable damage is done to our residents and our environment.

Ventura County has some of the oldest wells in California. The advanced age of the cement in these wells makes them particularly vulnerable to cracking. And, as publicized by Cornell University Professor of Engineering Anthony Ingraffea, a concrete expert and former researcher for the gas industry, *5% of all new wells fail immediately, and half will fail over a 30 year span!* ... allowing methane gas, heavy metals, radioactive materials, and other toxic substances from oil/gas drilling procedures to migrate into underground drinking water sources. A 50% failure rate as an industry standard in a mostly unmonitored, extreme energy extraction process is both irresponsible and dangerous! (In 2011, a mere 56 enforcement staff oversaw 54,300 drilling wells and over 29,000 class 2 underground injection wells for drilling waste disposal in CA.). Water contamination risk is particularly dangerous in the Monterey Shale because it is a low permeability rock formation, which makes conventional drilling less effective; so "acidizing" is additionally used to melt the rock, and other impediments, to increase oil flow. Acidizing is accomplished by injecting high volumes of hydrofluoric acid (HF) into the wells. HF is a powerful solvent that dissolves glass, steel, and rock. The U.S. Centers for Disease Control considers it one of the most hazardous industrial chemicals in use; but drillers are routinely issued permits without having to tell DOGGR whether they are fracking, using acid, or employing any other toxic/dangerous substances. Contamination from leaking wells is especially concerning given that the so-called 2005 Halliburton Loophole exempts oil and gas field toxic waste from federal laws ... including the Clean Water Act, the Clean Air Act, and the Safe Drinking Water Act.

One, single hydrofracking well can produce over a million gallons of wastewater laced with highly corrosive salts, cancer-causing chemicals, and radioactive elements. As published in the International Journal of Human and Ecological Risk Assessment, in a manuscript entitled "Natural Gas Operations from a Public Health Perspective", The Endocrine Disruption Exchange (TEDX) maintains a database of 980 products, including 649 chemicals, used during natural gas operations and investigated for their health effects. 90% of these had at least one potential harmful health effect. 47% of the products contain one or more chemicals that interfere with the endocrine system (a finely balanced system of glands and hormones that regulate vital body functions like growth, stress response, sexual development and behavior, insulin production and use, metabolic rates, intelligence, behavior, and reproductive ability). Because it operates at extremely low hormone concentrations, the endocrine system is susceptible to damage from very low levels of chemical exposure, which can negatively impact both organisms and their offspring, including humans. Of 362 chemicals positively identified, 78% can affect the skin, eye or sensory organs, respiratory and gastrointestinal systems, or liver; and 55% can harm the brain and nervous system. The associated health effects likely to appear immediately or soon after exposure include symptoms such as burning eyes, rashes, coughs, sore throats, asthma-like effects, nausea, vomiting, headaches, dizziness, tremors, and convulsions. Between 22% and 47% of the chemicals are also associated with possible longer-term health effects that can appear months or years later, including cancer, organ damage, and harm to the endocrine system. 48% of the chemicals

can have other health effects including changes in weight, teeth or bones and, most often, death. TEDX noted that many of the chemicals have multiple health effects. When categorized by the pathway that led to exposure, TEDX found that 210 of the chemicals (58%) are water soluble while 131 chemicals (36%) are volatile (ie: can become airborne). Of the volatile chemicals, over 93% can harm the eyes, skin, sensory organs, respiratory tract, gastrointestinal tract or liver; (86%) can harm the brain and nervous system; 72% can harm the cardiovascular system and blood; and 66% can harm the kidneys. Moreover, because they can be inhaled, swallowed, and absorbed through the skin, the potential for exposure to volatile chemicals is greater than that for exposure to soluble chemicals.

In addition to the above-noted chemicals added to fracking fluids, numerous volatile, naturally occurring, toxic chemicals found underground may also be released into wastewater during the fracking process.

The oil and gas industry is the only industry in America that is allowed by EPA to inject known hazardous materials – unchecked – directly into or adjacent to underground drinking water supplies ... without either the obligation nor the methodology to safely dispose of the wastewater which they produce. Not surprisingly, Professor Ingraffea believes safe fracking is simply a myth, and advises, "Where shale gas development has not yet occurred, ban it. Period. Where it is occurring, enact ironclad regulations, inspect for compliance with them with dogged diligence, and enforce them relentlessly with fines that really mean something."

If we as a community want to protect our neighborhoods, families and children, we must take preventative precautions, including serious consideration of county-wide bans on fracking, acidization, and wastewater injection wells NOW, BEFORE our public water supplies become laced with hazardous chemicals ... because the health and environmental damage resulting from these activities is life-threatening and often irreversible.

In the face of yet another climate change fueled extreme weather event, this time in the form of Hurricane Harvey, ravaging the Gulf Coast as I write, it is past time that we as a society takes immediate and decisive steps to end such catastrophic manmade destruction by ending approval for any more fossil fuel infrastructure and instead investing our dollars and land in limitless, clean, non-polluting, renewable forms of energy that won't poison our air, water and public health.

Sincerely,

Rose Ann Witt

Re: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Ms. Hall, I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do their duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

As an Oxnard resident, life-long asthmatic, entrepreneur, chapter leader of Progressive Democrats of America, Ventura County, and regional organizer for Healthy California, I am not afraid of speaking out against the private fossil fuel interests that have long held disproportionate impact over the health and wellbeing of Oxnard and Ventura County residents. Each day I struggle to breathe because of the constantly burning oil and gas flares that dot the landscape of South Oxnard, but I am not afraid of telling Renaissance Petroleum that their actions in our county are killing people. And that is why they are fighting their hardest against submitting their plans to an environmental impact review.

I am a mother, wife, and proud Choctaw and Chickasaw Indian. Renaissance Petroleum is colonizing the land through the theft of oil and destruction of land. This Bakersfield company is tearing apart the fertile Oxnard Plain without the basic decency of letting the residents that live a mere 1,600 feet away of their intention to poison them. The population of Oxnard is 70% Latino, and our own city council has expressed concerns for the health and lack of warning about the project for our people. Any rejection of our reasonable appeal is environmental racism.

No impact review. No oil and gas field.

Sincerely,

Troy Kathleen Corley

Subject: PL14-0103 – Renaissance Petroleum

Good Day Planning Commissioners Ms. Luke and Ms. Hall:

Please consider these among the costs of the proposed project, and of not going through the full environmental review process:

- Environmental Racism
- Need to study what the combined effects of oilfield pollutants and agricultural pesticides will be on farmworkers and nearby residents by doing a full environmental assessment
- New oil wells and oil production facility would increase air pollution and truck traffic near residents' homes, local elementary and middle schools, and Oxnard College
- The importance of the county being a good neighbor and listening to the City of Oxnard's request for this study.

Please require studies on environmental and health effects before issuing a 30-year extension on Renaissance Petroleum's oilfield operation and approving its expansion.

Thank you,
Mark Mendelsohn

As an Oxnard resident and founder of Our Revolution Gold Coast, I feel that the concerns of average Americans like myself need to be met before the interests of a privately owned Bakersfield oil company with no ties to Oxnard or Ventura County other than the current exploitations of our land and the people who live within 1,600ft of the Cabrillo Field. What harm could possibly come of requiring a full environmental impact study, when Oxnard already suffers from the effects of power plants and the Halaco superfund site on our beaches.

I am also deeply concerned about the impact further oil and gas developments have on our farmworker population. The Cabrillo Field is situated within prime agricultural land, with close proximity to a lettuce field. Petro-chemicals will contaminate groundwater, affecting the soil, produce, and above all the immediate health of the farmworkers who pick the produce; these farmworkers are also regularly exposed to dangerously high pesticides that are known carcinogens and a chief cause of birth defects in our community.

Lastly in light of the dedication our county supervisor board has shown toward the Paris Climate Accord in response to the failure of our federal government, the thirty year extension allowed in the permit is an insult to the people of Ventura County and those who voted in each supervisorial district. Oxnard residents are sick and dying from the pollution.

No impact review. No oil and gas field.

Dear Ms. Hall,

I hope this email finds you well. I am a fellow resident of Oxnard California, and currently have family living in the area as well. I am writing in support of the appeal of PL14-0103, and would like to demand that the Planning Commission uphold some form of moral responsibility in terms of finding what solutions would be in the best interest for my community of Oxnard. It is my understanding that the only good that will come out of implementing this project would be for selfish interests of private businesses. As you may or may not know, the residents of Oxnard have been suffering from high rates of health related illnesses linking back to dirty energy (such as the one trying to implement itself) for decades now. As a community member of Oxnard, I demand that you grant the appeal and send the project back to the planning department for a full and complete public health impact analysis that is **site specific**, and that fully acknowledges the Environmental Justice issues situated within my historically disadvantaged community. Oxnard will not stand for anymore of the abuses in which it has withstood in the face of exploitative greedy businessmen. I ask that you hear the voices of the residents who are taking a stand and voicing the concerns of many whom reside here. I hope that this message is heard, and that you respect the wishes of the residents here.

Regards,

Toni Diaz.

Dear Ms. Hall,

I am writing in support of the appeal of PL14-0103 and to ask the Planning Commission to do their duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

Frankly, it is deeply concerning that the Planning Commission would permit this project to move forward without fully considered the full impacts on environmental health, justice and global warming. Given the scientific evidence on climate change and the urgent need to move toward carbon reducing sustainable energy resources, the Planning Commission and Ventura County Board of Supervisions should be proactively supporting community choice energy solutions.

We must move away from our continued dependency on fossil fuels. The time for carbon reducing energy alternatives is NOW!

Hello Ms. Hall,

My name is Chloe Rosete and I was born and raised in Oxnard, Ca. Although I now live in Azusa, CA, due to university, I want what is best for my home. I am writing to you in support of the appeal of PL14-0103 because the health and comfort of the residents, as well as our environment, should be a priority. I hope that we are able to keep Oxnard beautiful by calling a halt to the installment of more oil and gas wells.

I am a member of the Ventura Democratic Socialists of America. I oppose the expansion of the Cabrillo oil fields without an environmental impact study. The residents, as well as schools and businesses deserve more respect than this. This is blatant disregard for a community who are already burdened with poor health and the blight of your wells. Shame on you!

Ms Hall,

Please grant the appeal so that an environmental study can be done. This will effect the residents of Oxnard immediately but will ultimately touch all of us living and enjoying life here in Ventura County. It was completely unjust to push this ahead without studying the impacts to our environment. Please grant the appeal and give everyone an opportunity to learn about the impacts and weigh the options.

I am a Ventura County resident writing in support of the appeal of PL14-0103. Given that the project is located in a state identified disadvantaged community and surrounded by schools, I ask that the planning commission grant the appeal and send the project back to the planning department for a **complete, site-specific review and public health impact analysis**. To allow this project to proceed is to fly in the face of justice, the environment, and the citizens of Ventura County and their children.

To: Hall, Anna
Subject: Cabrillo Oil Field Map w/ Schools & Naumann expansion
Attachments: Cabrillo Oil Field Map .pdf

Dear Ventura County Planning Commissioners,

The attached Cabrillo Oil Field map provides you with an overall view of the Cabrillo Oil Field and the proposed Naumann oil and gas facility expansion in proximity to 8 schools within 2 miles.

~ Oxnard College - 7150 students, 84% minority
~ Channel Islands High School - 2500 students, 98% minority
~ Condor High School - 500 students, 89% minority
~ Ocean View Junior High School - 800 students, 96% minority
~ Fred L Williams Elementary School - 675 students, 88% minority
~ Tierra Vista Elementary School - 750 students, 96% minority
~ Mar Vista Elementary School - 550 students, 97% minority
~ Ocean View Pre-school - 120 students, ages 3 - 5

Over 13,000 children and young adults, more than 90% minority students

Most of these are Elementary and High School students who are outside every school day for regular Physical Education classes and Sports programs. The proposed Naumann oil pad expansion will spew increased amounts of harmful oil and gas emission pollutants into the air from a flare with a continuous pilot and unknown amounts of emissions from unplanned flaring.

In addition, the approved permit allows three (3) truckloads of produced fluids to be exported from the site in any one (1) hour, and oil tanker trucks may enter and exit the facility 24 hours per day, 7 days per week...trucks that will be entering and exiting the same routes, at the same time, that students are on the road being transported to and from school.

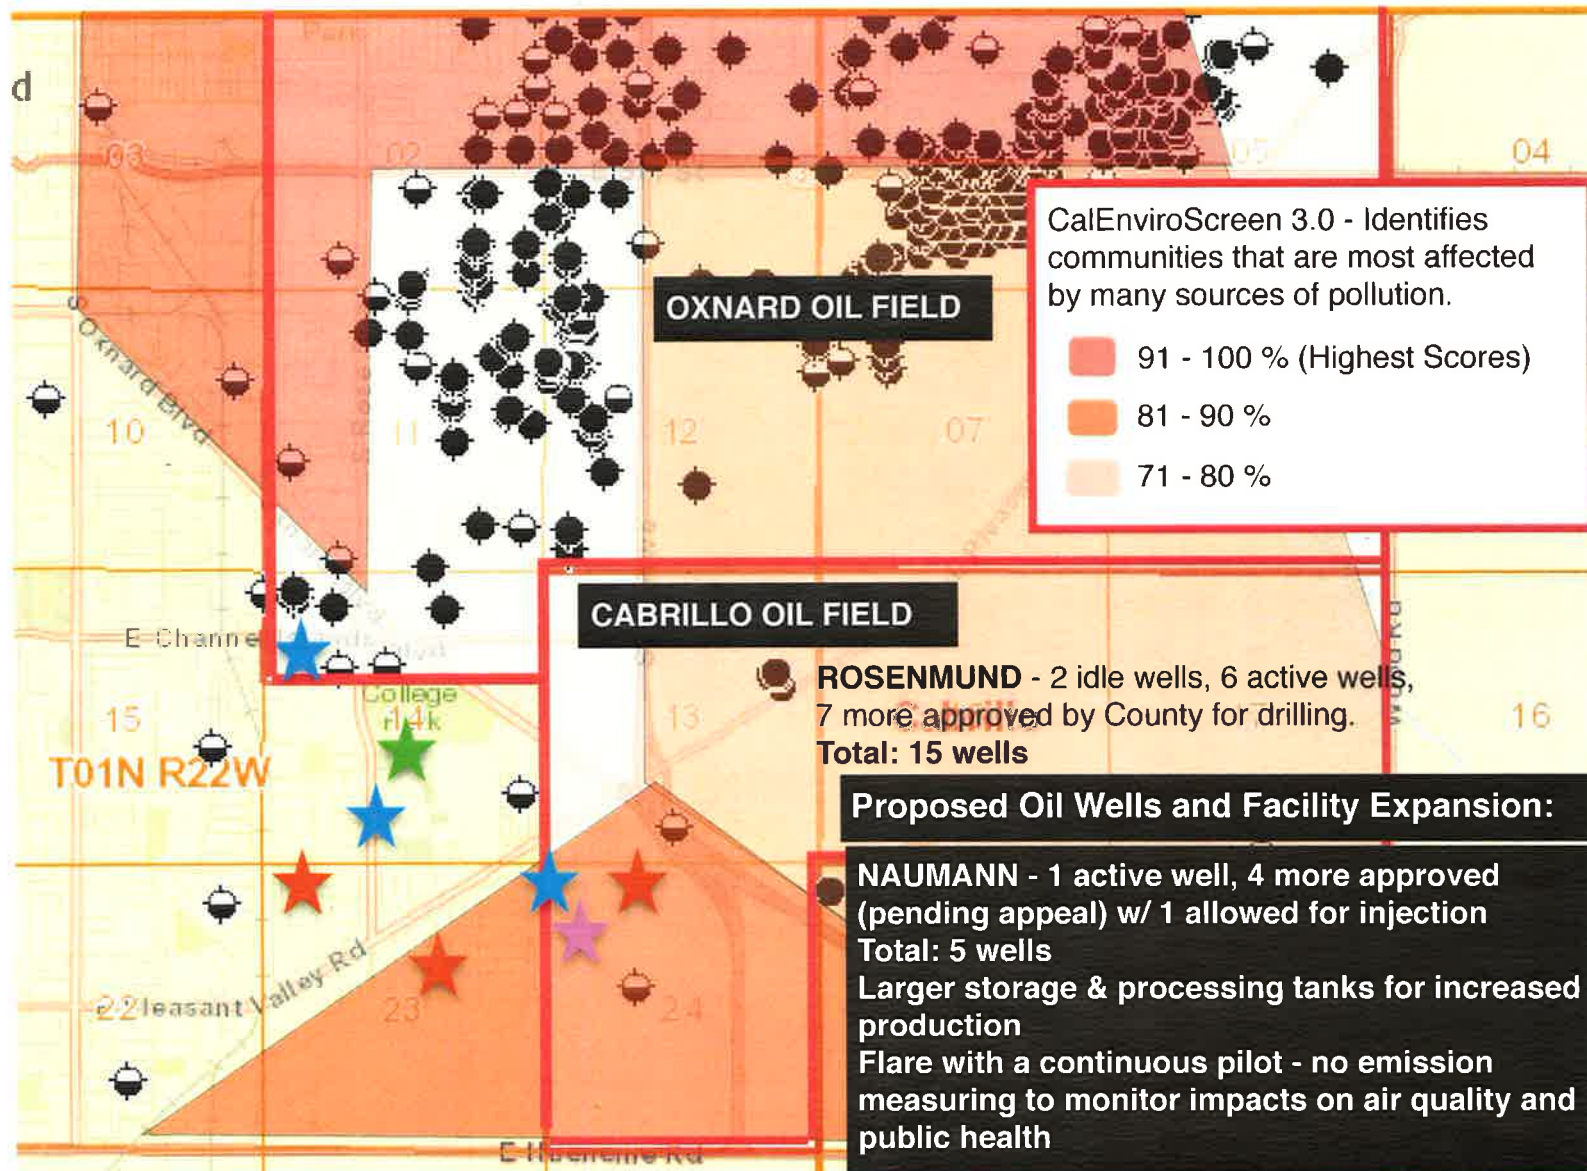

This map also shows the CalEnviroScreen 3.0 areas in this area. The Cal EnviroScreen is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution.

Note the red area with the highest EnviroScreen score between 90 - 100% around the Oxnard Oil Field just north of the Cabrillo Oil field. It reflects the impact of the over 30 active wells in the Oxnard Oil Field.

The EnviroScreen score in the Cabrillo Oil Field area is between 70 - 90%. With the approval of more oil and gas wells, the resulting increase in production will mean greater amounts of oil and gas emission pollutants will only increase the impact on the already "disproportionately burdened" surrounding communities.

Why, at this point, would Ventura County want to increase oil and gas production in this area and the resulting harmful health impact on both residents and nearby schools to a greater degree in the future?

To: ed@cfrog.org

I reviewed the on-line document dated February 2017 from the Ventura County Planning Commission concerning the Renaissance Oil development of 4 additional wells at the site.

I noticed that the Mitigated Negative Declaration was dated in December 1986. Is the Planning Commission basing their approval of the project on this report? It seemed to me that the report was more of a checklist rather than an objective study.

I also noticed that the diagram of the operation both pre-development and post-development indicated the location of glycol units. I am not an oilfield engineer and my opinion is based on a few hours of internet research but there appears to be a significant concern with the outlined construction.

The placement of the units does not change with respect to the two plans. Are these units the same units that may have been in operation since the date of the previous mentioned MND? I understand that ethylene glycol compounds have been used to desiccate extracted natural gas. The glycol chemicals then have to be processed to remove accumulated water and other compounds as volatile organics including methane, benzene, toluene, ethylbenzene and xylenes. Renaissance shows no detailed plan shown to illustrate the process by which the glycols are recycled.

Older glycol units have been associated with significant release of the previously mentioned pollutants and release could also occur with increased natural gas production, breakdown or inadequate processing of the desiccants, equipment failure and operator error. If the operator intends to use 31 year old technology this would result in significant release of these toxic agents into the environment. Another concern is the release of methane for many of the same reasons. Some of these chemicals are neurotoxic or carcinogenic. Exposures considered 'safe' are measured in parts-per-billion for these chemicals.

Has the Planning Commission allowed for Renaissance Oil to use outdated equipment by using old information in their report? The report also allows for periodic inspections of the facility but appears to let the company primarily self-monitor. Is the use of a document dated 1986 a measure to circumvent 1990's regulation which mandated a 90% reduction in release of volatile organics? If these questions are verified this may signify a level of corruption in county government. Will the operator be able to provide relief when people develop cancers, respiratory or neurological disease? Will the operator be able to provide mitigation for increase in smog as a result of atmospheric volatile organics release? If the groundwater is contaminated will be extractor be able to provide water processing? Are agricultural areas safe from contamination? Will there be any reassurance beyond a simple checklist of community safety?

There are many more questions about this project but I have focused only on basic desiccation operations. When I pump gasoline into my car or buy a can of spray lubricant there is a Proposition 65 Warning that accompanies use of the product. Will we have to issue Proposition 65 Warnings for use of the air? I refer to biological respiration.

Sent: Tuesday, September 05, 2017 1:53 PM
To: Hall, Anna
Subject: Cabrillo Oil Field and Naumann Expansion

Dear Ventura County Planning Commissioners,

I do not think that this proposed Oil Field is a proper fit for the area.

The proposed expansion will send increased amounts of harmful oil and gas emissions into an area that has 8 schools within 2 miles with students who are outside every school day for recess and Physical Education. Three truckloads of fluids will be allowed to be transported from the site in any one hour time period. In addition oil tanker trucks will be allowed to enter and exit 24/7. They will be using the same routes that will be used by children being transported to and from school.

The Cal EnviroScreen 3.0 is a tool that helps identify communities that have a disproportionate level of pollution from multiple sources. The Oxnard Oil field which is adjacent to the Cabrillo Oil Field area has been identified as having the highest score of between 90-100%. The Cabrillo Oil Field area also has a high score of between 70-90%.

I ask you not to approve this extension as it will unfairly strain an area that has already been identified as having a disproportionate burden.

Dear Ms. Hall.

I am writing to ask that the planning commission NOT consider expanding oil field production in Oxnard.

It is far past time for us to abandon oil and seek cleaner energy. Our focus needs to be on the future. We need to find solutions, and we know oil is not it. It is time to put the environment before profits.

Thank you.

Heather Casanave

RE: Cabrillo Oil Field Expansion, Renaissance Petroleum, PL14-0103

I am tired of more and more sources of industrial pollution going up in South Oxnard. We are beset on all sides by air pollution from oil & gas wells, heavy metals & radioactive material from the Halaco site, and the exhaust from every gas-fired power plant on the Oxnard plain. The compounded effects from all these sources should be studied before they are given permits to add even more.

Carbon fumes don't stick to parcel boundaries. They will blow to schools, mobile home parks, farms, and more, not just Oxnard but up in Montalvo, to SLO, to the Ocean and neighboring Mexico.

Planning Commission needs to protect farm workers and soil and water, Ventura County's most precious resources. All fossil fuels are obsolete. Healthy energy is available to us.

RE: Cabrillo Oil Field Expansion, Renaissance Petroleum, PL14-0103

After the various oil spills, gas leaks, and land+air pollution I'm not in favor of this expansion. If it goes through, it better be earthquake proof with extremely secure pipes. I worry about corroding pipes that could break and leak. When I lived near a plant in Boston, MA, anything around it was touched by the Sulphuric Acid coming out of the smoke stacks. With lessening EPA control I fear the quality of the air will become much worse.

Anna,

What on earth am I, a citizen of Oxnard - actually a third generation citizen of this city, pay taxes for? To expand this oil field with no environmental health impact review - please tell me this is a mistake. This is a beautiful city, I've had many friends who lived in LA & Santa Barbara who thought I must be dumb or crazy to live in such a 'horrible, gang infested' place and doing something like this just increases that perception.

I hope you will make sure the future health of the our local environment will overshadow any reason why you would skip this critical step to keep this beautiful town the way those of us who have lived here their whole life know it is.

Thank you.
