**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision**  
**Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision  
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Director's Decision  
Approved Permit Modification PL14-0103 dated April 3, 2017**

Dear Planning Commissioners,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. I am aware that RenPet has a hearing before the Planning Commission on September 7, 2017 to consider an appeal of the Planning Director's approval of permit modification PL14-0103 dated April 3, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification as well.

Sincerely,

**RE: Appeal of Renaissance Petroleum Permit Modification**

Dear Commissioners,

I am extremely aware of the number of regulations the oil and gas industry must comply with in California. Those regulations are in place to assure safety for workers and to protect our environment.

When all regulations are met, local government has the duty to issue or modify permits pertaining to oil and gas operations. This was the case with the permit modification for the Cabrillo Oil Field. Ventura County staff followed the letter of the law and granted a permit modification.

The appeal of the Renaissance Petroleum permit modification by Citizens for Responsible Oil and Gas (CFROG) and Food & Water Watch (FWW) is meritless. Their claim of environmental injustice is not supported by facts. There have been no reported instances of danger to any person in the vicinity of the Cabrillo Oil Field and Renaissance has a spotless safety record at the site.

I ask that you deny the appeal.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chris Do', written over a horizontal line.

Ventura, CA 93009-1740

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and I support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

RE: Case No. PL14-0103, Renaissance Petroleum Permit Modification

Dear Chair Onstot and Commissioners:

This letter is to express my support of the Conditional Use Permit modification application filed by Renaissance Petroleum and to oppose the appeal of the Ventura County Planning Director's approval of the Minor Modification on April 3, 2017.

The staff report for this item states that, "Planning Division staff have not identified any new potentially significant impacts, or any increase in severity of a previously-identified significant impact, associated with the proposed project that warrant major revisions to the Mitigated Negative Declaration (MND). Thus, staff recommends that the Commission find that no subsequent or supplemental EIR is required for the proposed project, and the MND Addendum is the appropriate document to satisfy the environmental review requirements of CEQA."

The staff report also states, "The assertions made by the Appellants are general in nature and do not identify any specific violation committed by the Planning Director."

It appears the appeal is unfounded and could be deemed frivolous.

Thank you for your consideration to deny the appeal and support the permit modification.

Sincerely,

  
Fred J. Ferro, V.P.

RE: Renaissance Petroleum Permit Modification, Case No. PL14-0103

Chair Onstot and Commissioners:

This letter is to express my support of Renaissance Petroleum's application for a permit modification and to oppose the appeal filed against the project.

I believe the Planning Commission Staff Report speaks for itself on this project. It is clear that the operator wishes to improve the Cabrillo Oil Field. As is required by California law, all of the drilling, completion, and production operations must be conducted in accordance with the rules and regulations of the California Department of Conservation, Division of Oil and Gas and Geothermal Resources.

The permit modification does not seek to incorporate hydraulic fracturing or other well stimulation techniques. The applicant has also agreed to implement a fluid truck transport limit and restrict truck traffic to only a segment of Etting Road east of the Naumann lease facility.

The Staff Report states the modification request satisfies the environmental requirements of CEQA with a Mitigated Negative Declaration Addendum, since Planning Division staff has not identified any new potentially significant impacts associated with the project.

Regarding the appellants, CFROG has developed a track record of appealing nearly every oil and gas ruling made in Ventura County since their inception in 2013. The fact that they have lost every appeal to date indicates their claims are meritless.

Thank you for your consideration to deny the appeal and support the permit modification.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tom Cady', with a stylized flourish at the end.

Tom Cady, President  
TKC Enterprises

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Onstot:

I am a Ventura County resident and the work I do helps support the oil industry. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the subject approved permit modification for Renaissance Petroleum, LLC (RenPet) is under appeal. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's decision to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

**SUBJECT: Appeal of Planning Commission's Decision to Approve PL14-0103**

Dear Chairman Zaragoza and Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, the Naumann Drillsite, which is the subject of the subject appeal. The Naumann Drillsite is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. Permit application PL14-0103 is a minor permit modification to the existing CUP.

As you know, on September 7, 2017, the Planning Commission **approved** the Planning Director's decision to approve PL14-0103. That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on December 5, 2017. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the frivolous appeal in its entirety and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Sincerely,

A handwritten signature in dark ink, appearing to read "Wendy M. Milovina", followed by a horizontal line and the word "Trustee" written in a cursive script.

**SUBJECT: Appeal of Planning Commission's Decision to Approve  
Permit Modification PL14-0103**

Dear Chairman Zaragoza and Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, the Naumann Drillsite, which is the subject of the subject appeal. The Naumann Drillsite is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. Permit application PL14-0103 is a minor permit modification to the existing CUP.

As you know, on September 7, 2017, the Planning Commission **approved** the Planning Director's decision to approve PL14-0103. That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on December 5, 2017. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

I support RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the frivolous appeal in its entirety, and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Sincerely,

Richard W. Pidduck, Trustee  
RW Pidduck Trust

That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on December 5, 2017. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the frivolous appeal in its entirety and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Sincerely,

**SUBJECT: Appeal of Planning Commission's Decision to Approve PL14-0103**

Dear Chairman Zaragoza and Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, the Naumann Drillsite, which is the subject of the subject appeal. The Naumann Drillsite is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. Permit application PL14-0103 is a minor permit modification to the existing CUP.

As you know, on September 7, 2017, the Planning Commission **approved** the Planning Director's decision to approve PL14-0103. That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on December 5, 2017. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the frivolous appeal in its entirety and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Sincerely,

**SUBJECT: Appeal of Planning Commission's Decision to Approve PL14-0103**

Dear Chairman Zaragoza and Supervisors,

We own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, the Naumann Drillsite, which is the subject of the subject appeal. The Naumann Drillsite is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. Permit application PL14-0103 is a minor permit modification to the existing CUP.

According to RenPet, the Planning Commission **approved** the Planning Director's decision to approve PL14-0103 on Sept 7, 2017. However, another appeal will be heard before you on December 5, 2017.

We are senior citizens who depend in part on oil and gas royalties received from the RenPet wells under discussion.

It is our understanding from the PL14-0103 staff report that was prepared by the Ventura County Planning staff in advance of the Planning Commission hearing, that RenPet is exercising "Best Practices" to produce oil and gas associated with the Cabrillo Oil Field, and that RenPet is in full compliance with California environmental regulations, the regulations of the California Division of Oil and Gas, and the Ventura County Air Pollution Control District. Given the foregoing, we support RenPet and urge you to reject the appeal.

Sincerely,

Kathleen and Douglas Horacek

**SUBJECT: Appeal of Planning Commission's Decision to Approve PL14-0103**

Dear Chairman Zaragoza and Supervisors,

My clients own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, the Naumann Drillsite, which is the subject of the subject appeal. The Naumann Drillsite is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. Permit application PL14-0103 is a minor permit modification to the existing CUP.

As you know, on September 7, 2017, the Planning Commission **approved** the Planning Director's decision to approve PL14-0103. That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on December 5, 2017. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

On behalf of my clients, we are in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. We urge you to reject the frivolous appeal in its entirety and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Sincerely,

Jon Nishimori, CPA, Esq.

**SUBJECT: Appeal of Planning Commission's Decision to Approve PL14-0103**

Dear Chairman Zaragoza and Supervisors,

I own real property interests in an unincorporated portion of Ventura County that are in close proximity to the Naumann Drillsite, an oil and gas facility that is the subject of the subject appeal. I live on the property which is located south of Etting Road, north of State Highway 1, and west of Naumann Road. The oil and gas facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-LU05-0086. **My home is just over 500 feet west of the Naumann Drillsite. My home is the closest residence to the Naumann Drillsite. The next closest is more than 1500 feet from the Naumann Drillsite. My home is 1000 feet southeast from the city limits of Oxnard. I do not hear or smell anything associated with the activities at the Naumann Drillsite. With the volume of truck traffic already traveling Etting Road, two additional trucks per day is insignificant.**

As you know, on September 7, 2017, the Planning Commission approved the Planning Director's decision to approve PL14-0103. That decision was subsequently appealed to you by the same appellant group without any additional facts or information to support the appeal. The appeal will be heard before you on March 13, 2018. The appellants demand that an environmental impact report be prepared in spite of the fact that the Planning staff and other County agencies have demonstrated that the environmental analysis that has been performed is appropriate and have found that the impacts from the project are less than significant.

I am in full support of RenPet's activities and the Planning Director's approval of RenPet's permit modification. I urge you to reject the frivolous appeal in its entirety and that you approve the subject permit modification as previously approved by the Planning Director and Planning Commission.

Dear Mr. Bennett:

I am a Ventura County resident and the work I do helps support the oil industry in Ventura County. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

Ventura, CA 93009-1740

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and the work I do helps support the oil industry in Ventura County. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

Print Name: Eric Kroh

The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and the work I do helps support the oil industry in Ventura County. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

Print Name: Blaine Skupski

Address: 55 Sycamore Drive

**SUBJECT: Appeal of Planning Commission Decision  
Approved Permit Modification PL14-0103 dated September 7, 2017**

Dear Board of Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-4384 (LU05-0086). I am aware that RenPet has a hearing before the Board of Supervisors on July 23, 2019 to hear an appeal of the Planning Commission's approval of permit modification PL14-0103 which was approved on September 7, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Commission's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification.

Sincerely,

**SUBJECT: Appeal of Planning Commission Decision  
Approved Permit Modification PL14-0103 dated September 7, 2017**

Dear Board of Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-4384 (LU05-0086). I am aware that RenPet has a hearing before the Board of Supervisors on July 23, 2019 to hear an appeal of the Planning Commission's approval of permit modification PL14-0103 which was approved on September 7, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Commission's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and the work I do helps support the oil industry in Ventura County. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Ventura, CA 93009-1740

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and the work I do helps support the oil industry in Ventura County. The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

**SUBJECT: Appeal of Planning Commission Decision  
Approved Permit Modification PL14-0103 dated September 7, 2017**

Dear Board of Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-4384 (LU05-0086). I am aware that RenPet has a hearing before the Board of Supervisors on July 23, 2019 to hear an appeal of the Planning Commission's approval of permit modification PL14-0103 which was approved on September 7, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Commission's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and I support the oil and gas industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents in addition to tax revenues to the County and royalties revenues to landowners.

It has come to my attention that the subject permit modification for Renaissance Petroleum, LLC (RenPet) that was approved by the planning Director and the Planning Commission is now once again under appeal to the Board of Supervisors. The appeals have been made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's and Planning Commission's decisions to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

Diane Sutton

Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

**I am a Ventura County resident and the work I do helps support the oil industry in Ventura County.** The oil industry has a long history of activity in Ventura County and provides jobs to support people such as myself and my family. It has come to my attention that the permit modification for Renaissance Petroleum, LLC (RenPet) that was previously approved by your Planning Director and the Planning Commission is now being appealed to your Ventura County Board of Supervisors. The appeal was made by environmental groups that are attempting to drive the oil industry from Ventura County, the industry which I'm proud to be a part of and the industry that feeds my family. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. The reasons behind the appeal are groundless. I urge you to deny this groundless appeal as your Planning Director and Planning Commission did previously.

Sincerely,

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and **I support the oil and gas industry**. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents in addition to providing tax revenues to the County and royalties revenues to landowners.

It has come to my attention that the subject permit modification for Renaissance Petroleum, LLC (RenPet) that was approved by the planning Director and the Planning Commission is now once again under appeal to the Board of Supervisors. The appeals have been made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's and Planning Commission's decisions to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Approved Permit Modification PL14-0103 dated September 7, 2017**

Dear Board of Supervisors,

I own real property interests within Ventura County that are in the vicinity of a producing oil and gas facility, located on the south side of Etting Road, north of State Highway 1, and west of Naumann Road. This facility is operated by Renaissance Petroleum, LLC ("RenPet") currently under Ventura County conditional use permit CUP-4384 (LU05-0086). I am aware that RenPet has a hearing before the Board of Supervisors on July 23, 2019 to hear an appeal of the Planning Commission's approval of permit modification PL14-0103 which was approved on September 7, 2017.

Please be advised that I am in full support of RenPet's activities and the Planning Commission's approval of RenPet's permit modification. I urge you to reject the appeal in its entirety and that you approve the subject permit modification.

**SUBJECT: Appeal of Approved Permit Modification  
Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and I support the oil and gas industry. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents in addition to tax revenues to the County and royalties revenues to landowners.

It has come to my attention that the subject permit modification for Renaissance Petroleum, LLC (RenPet) that was approved by the planning Director and the Planning Commission is now once again under appeal to the Board of Supervisors. The appeals have been made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's and Planning Commission's decisions to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

## Allow Renasissance Petroleum to fullfill its permitted 4-well drill program

---

From: Bob Blackmur (BBlackmur@dcorllc.com)

To: steve@renpetllc.com

Date: Thursday, July 11, 2019, 11:26 AM PDT

---

As a geologist (UC Berkeley bachelor's degree, UCSB master's degree) and Ventura County resident, I believe that Renaissance Petroleum has met all the many requirements towards its upcoming 4-well drilling program, and should be allowed to drill within all the legal and permitted guidelines.

Regards,

Bob Blackmur

**To: Ventura County Board of Supervisors**  
Steve Bennett, Chairman (District 1)  
Linda Parks (District 2)  
Kelly Long (District 3)  
Bob Huber (District 4)  
John Zaragoza (District 5)

**Send to:**  
Ms. Bonnie Luke, Planner  
Ventura County RMA- Planning Division  
800 South Victoria Avenue  
Ventura, CA 93009-1740

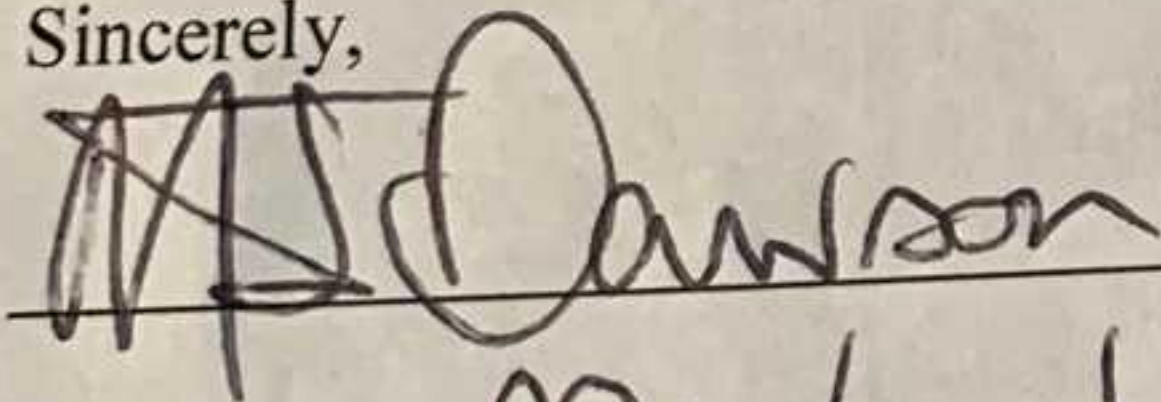

**SUBJECT: Appeal of Approved Permit Modification**  
**Case Number PL 14-0103 (Renaissance Petroleum, LLC)**

Dear Mr. Bennett:

I am a Ventura County resident and **I support the oil and gas industry**. The oil industry has a long history of activity in Ventura County and provides jobs to support many Ventura County residents in addition to providing tax revenues to the County and royalties revenues to landowners.

It has come to my attention that the subject permit modification for Renaissance Petroleum, LLC (RenPet) that was approved by the planning Director and the Planning Commission is now once again under appeal to the Board of Supervisors. The appeals have been made by environmental groups that are attempting to drive the oil industry from Ventura County. The tactics of these groups include spreading false information and unnecessarily alarming the public in order to achieve their agenda. In my opinion, the grounds for the appeal have no basis in fact and I agree with the Planning Director's and Planning Commission's decisions to approve the subject permit modification. I urge you to do the same, and to deny the groundless appeal.

Sincerely,

Print Name: Michael Dawson

Address: 162 Baldwin Rd

City: Ojai CA

**Subject:** PL14-0103 – Renaissance Petroleum  
**Importance:** Normal

---

Good Day Planning Commissioners Ms. Luke and Ms. Hall:

Please consider these among the costs of the proposed project, and of not going through the full environmental review process:

- Environmental Racism
- Need to study what the combined effects of oilfield pollutants and agricultural pesticides will be on farmworkers and nearby residents by doing a full environmental assessment
- New oil wells and oil production facility would increase air pollution and truck traffic near residents' homes, local elementary and middle schools, and Oxnard College
- The importance of the county being a good neighbor and listening to the City of Oxnard's request for this study.

Please require studies on environmental and health effects before issuing a 30-year extension on Renaissance Petroleum's oilfield operation and approving its expansion.

Thank you,  
Mark Mendelsohn  
Ventura County, CA

**Subject:** Re: In OPPOSITION to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Anna,

What on earth am I, a citizen of Oxnard - actually a third generation citizen of this city, pay taxes for? To expand this oil field with no environmental health impact review - please tell me this is a mistake. This is a beautiful city, I've had many friends who lived in LA & Santa Barbara who thought I must be dumb or crazy to live in such a 'horrible, gang infested' place and doing something like this just increases that perception.

I hope you will make sure the future health of the our local environment will overshadow any reason why you would skip this critical step to keep this beautiful town the way those of us who have lived here their whole life know it is.

Thank you.

Felicia Henry

**Importance:** High

Dear Chair Onstot, Vice Chair Rodriguez and Planning Commissioners,

As a citizen of Oxnard, I write this communication to voice my opposition to the Cabrillo Oil Field Expansion Project.

It is time to tell the petroleum industry that enough is enough! The Planning Director's decision should be reversed and this project should either be denied or at least the Commissioners should insist on the preparation of a complete and thorough Environmental Impact Report. Much has changed since this oil field was first implanted in the heart of Oxnard's prime farm land. Now, we must also contend with the proximity of these oil fields to the mobile home parks and schools that serve minority and poor Oxnard neighborhoods.

The 9/7/17 report submitted by Citizens for Responsible Oil and Gas is instructive and should be taken very seriously and studied by the Commissioners. Whether you look at this project from the perspective of environmental justice, human health, its cumulative effects over the years or even aesthetics, it is time to require a thorough environmental review of this project and the continuing nuisance that the Cabrillo Oil Field poses in Oxnard's back yard.

I find it quite stunning that the County would actually authorize the expansion of this oil field and the extension of its CUP for an additional thirty years. Why is it that the County could only authorize the extension of a telecommunications tower on Rasnow Peak for a maximum of ten years even when no expansion of that passive activity was even proposed, yet the County can see fit to extend the CUP for this petroleum project for an additional 30 years? Is it because this project is in a poor neighborhood in Oxnard, while the telecommunications facility is in the Thousand Oaks area? How is it that aesthetics in Newbury Park are more important than environmental justice and human health or aesthetics in southeastern Oxnard? This dichotomy is a disgrace, especially considering that the County has chosen to forgo the preparation of an Environmental Impact Report for this petroleum project. Thirty years is a long time, especially now as we see so many drastic changes in our environment. The effects and mission creep of the petroleum industry on our environment and our climate can no longer be denied or ignored. A couple of days ago the temperature in Oxnard exceeded 100 degrees – another broken record in a growing list of unprecedented local climate changes. Where are we headed?

This has been a couple of weeks demonstrative of the tremendous force and impacts of climate change on our nation. Whether we point to the two most recent hurricanes challenging Texas and the southeastern United States, or the tremendous wild fires in Montana, in our own state or our neighbors to the north, we must wake up and smell the coffee. We must wrest control from the oil and gas industry and take charge of our world or there will be nothing left of this world to hand to our grandchildren.

The future of all of our grandchildren is at stake. I ask you to protect those who are least able to protect themselves or their planet. We are the adults in the room. It is about time we act like it.

I respectfully request that you grant the appeal and deny the project, or in the alternative require that a full scope environmental impact report be prepared, and that it specifically study the impacts on environmental justice.

Oxnard, CA 93035

Dear Ms. Hall

Please be advised the citizens of Ventura County are requesting an Environmental Study in regards to adding more oil drilling in our city.

I would also like to bring to your attention the death of, not just humans, but domestic and wild animals in our area caused from oil drilling.

Why wouldn't you want to use more solar, wind, and electric power as part of a more diverse use of energy? We need forward thinking public officials and citizens to make Ventura County a better place for us to live and work.

Thank you for your attention and hard work on this matter.

Sincerely,

Marsha Jamison

Ventura, CA 93009

Re: Standing with CFROG and Food & Water Watch in Support for Appeal of LU14-0103

Dear Board of Supervisors,

We the undersigned support the appeal of the Renaissance Petroleum oil and gas expansion project in Oxnard – LU14-0103.

Expansion of oil and gas activities at this location is inappropriate without proper review of the impacts to surrounding residents and those who work and go to school in the area.

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies - U.S. EPA

Some of the surrounding communities (near this project) meet the qualifications of a disadvantaged community and already score high on the CalEnviroScreen tool.

This project adds oil and gas wells, allows more oil tanker trucks and completely removes any timing restrictions for truck traffic. The project will contribute more pollution to the neighborhood.

Therefore, we stand with CFROG and Food & Water Watch in asking Ventura County to abide by the tenets of environmental justice and not approve this project as presented.

David Hildebrand  
Candidate For U.S. Senate

Dear Supervisor Kelly Long,

I am writing in opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project. My name is Caressa Eve Suarez and I am a full time student at California State University, Channel Islands in Camarillo. I am opposed to the environmental injustices happening in my district, specifically in Oxnard, which is already ranked in the top 20% of environmentally burdened cities in the state of California. Please take the time to read my letter attached, and consider the public's health and the movement toward clean energy as highest priority. I trust that as our District Supervisor, you will represent the interests of the public.

 **Letter in Opposition to Cabrillo Oil Field to B...**

Thank you for your time and consideration,

Caressa Eve Suarez

Re: In opposition to project PL14-0103, Renaissance Petroleum, Cabrillo Oil Field Expansion Project

Dear Supervisor Kelly Long,

I am writing in support of Citizens for Responsible Oil and Gas (CFROG) and Food & Water Watch's appeal of PL14-0103 and to ask you to do your duty and put public health ahead of private business interests by granting the appeal and sending the project back to the planning department for a full and complete public health impact analysis that is site specific, with direction to consider Environmental Justice issues because the project is located in a state identified disadvantaged community.

As a resident of district 3, the health and wellbeing of my community is of the highest priority, as it should be to you too. It is unfair that my friends and neighbors have been denied the right to know how the expansion of the Cabrillo Oil Field to an approved total of twenty oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years. The Cabrillo Oil Field lies 1,600ft from two residential mobile home parks and a mere two blocks away from the City of Oxnard.

Furthermore, what impact will this have on the personal incomes of those living closest to the site? Adverse public health affects workers' rights to earn money for their households and sustain the local economy. Local businesses and schools are interested in the health and future of our economy. That future lies in clean air for children and renewable technology that will make Ventura County state and national leaders.

Earlier this year the board of supervisors voted to uphold Paris Climate Accord. If the appeal for further safety measures should fail, it would be a violation of that promise to reduce greenhouse gas emissions. The California state legislature is also responding to the threat of climate chaos with the California Clean Energy Act of 2017, which would see 100% renewable energy usage by 2045. The bill introduced by state senate pro Tempore Kevin De Leon is a benchmark for the future of Ventura County.

Please join these persons and organizations, along with myself and over 2,000 other petition signers in granting the appeal of PL14-0103, ensuring public health is considered above the private interests of a Bakersfield oil company:

- Craig Helmstedter, Ocean View School District Superintendent
- The Greater Oxnard Organization of Democrats - GOOD Club
- Service Employees International Union - SEIU
- Progressive Democrats of America, Ventura County
- Daraka Larimore-Hall, CDP Vice-Chair
- Showing Up for Racial Justice, Ventura County
- RL Miller, CDP Environmental Caucus Chair
- Kenny Sylvain, California Nurses Association representative, Ventura County Medical Center
- Carmen Ramirez, Mayor Pro-Tempore, City of Oxnard
- Oscar Madrigal, Oxnard City Council member
- Climate Hub 350
- Central Coast Alliance United for a Sustainable Economy - CAUSE

- Sierra Club, Los Padres Chapter
- Mixteco Indigena Community Organizing Project - MICOP
- David Hildebrand, Candidate for U.S. Senate

Sincerely,

Caressa Eve Suarez

**Subject:** drilling in Oxnard

Hiya...hope you're well...speaking of WELLS...could you please tell me what is going on with the drilling in South Oxnard? Can we get some public notice out here? Can we get a modern environmental review?

It is becoming increasingly icky to drive down Rice Road because the smells from the WELLS are choke-worthy! How can it be ok to have so many wells in ONE place, right next to the city?

I am BREATHING here! And it is becoming more and more difficult! Can you put some of my tax dollars to work and find out what is going on? This is happening within 1/2 a mile of my school!

Please tell Oxnard citizens what is going on and what the drillers plan to do about the horrid smells emanating from their sites!

I am terrified to ask questions about our water table...

Thanks,  
Val Polacek

**Subject:** Environmental Justice in Oxnard, CA

Dear Mr. Foy,

I am writing in support of Food & Water Watch's and Citizens for Responsible Oil and Gas (CFROG)'s appeal of PL14-0103. I'm asking you to do your duty of putting public health before corporate profit by granting the appeal and sending the project back to the planning department.

These new oil wells and oil processing hub will be within 1,600 ft of residents homes and are within 2 miles of 8 Oxnard Schools. There should be a full and complete public health impact analysis that is site specific, with direction to consider environmental justice issues because the project is located in a state identified disadvantaged community.

This community has already suffered from years of pollution from pesticides and the oil industry, which has contributed to asthma rates above the 90 percentile!

Drilling sites like these produce harmful chemicals which can affect people's reproductive and central nervous systems; and ethylbenzene and xylenes which may have respiratory and neurological effects. The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

Audra Lucas

These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

Allassandra Rhody

Dear Mr. Foy,

I am writing in support of Food & Water Watch's and Citizens for Responsible Oil and Gas (CFROG)'s appeal of PL14-0103. I'm asking you to do your duty of putting public health before corporate profit by granting the appeal and sending the project back to the planning department.

These new oil wells and oil processing hub will be within 1,600 ft of residents homes and are within 2 miles of 8 Oxnard Schools. There should be a full and complete public health impact analysis that is site specific, with direction to consider environmental justice issues because the project is located in a state identified disadvantaged community.

This community has already suffered from years of pollution from pesticides and the oil industry, which has contributed to asthma rates above the 90 percentile!

Drilling sites like these produce harmful chemicals which can affect people's reproductive and central nervous systems; and ethylbenzene and xylenes which may have respiratory and neurological effects. The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

Margaret Morris  
2866 Apache Ave

Dear Mr. Foy,

I am writing in support of Food & Water Watch's and Citizens for Responsible Oil and Gas (CFROG)'s appeal of PL14-0103. I'm asking you to do your duty of putting public health before corporate profit by granting the appeal and sending the project back to the planning department.

These new oil wells and oil processing hub will be within 1,600 ft of residents homes and are within 2 miles of 8 Oxnard Schools. There should be a full and complete public health impact analysis that is site specific, with direction to consider environmental justice issues because the project is located in a state identified disadvantaged community.

This community has already suffered from years of pollution from pesticides and the oil industry, which has contributed to asthma rates above the 90 percentile!

Drilling sites like these produce harmful chemicals which can affect people's reproductive and central nervous systems; and ethylbenzene and xylenes which may have respiratory and neurological effects. The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

M Jones

Dear Mr. Foy,

I am writing in support of Food & Water Watch's and Citizens for Responsible Oil and Gas (CFROG)'s appeal of PL14-0103. I'm asking you to do your duty of putting public health before corporate profit by granting the appeal and sending the project back to the planning department.

These new oil wells and oil processing hub will be within 1,600 ft of residents homes and are within 2 miles of 8 Oxnard Schools. There should be a full and complete public health impact analysis that is site specific, with direction to consider environmental justice issues because the project is located in a state identified disadvantaged community.

This community has already suffered from years of pollution from pesticides and the oil industry, which has contributed to asthma rates above the 90 percentile!

Drilling sites like these produce harmful chemicals which can affect people's reproductive and central nervous systems; and ethylbenzene and xylenes which may have respiratory and neurological effects. The proposed processing facility will also flare more gas, emit air pollution, and require a significant number of trucks to transport crude oil. These trucks will be using the same routes as many of the residents and school buses.

Residents deserve the right to know how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families for thirty more years!

**Subject:** Protect Ventura County Families' Health & Our Shared Climate Stability

Dear Mr. Foy,

I am writing as a biologist, the mother of an asthmatic child, a Ventura County resident concerned about the documented seismic, water use, and water contamination risks associated with hydraulic fracturing, and as a consistent voter who is closely watching your decision in matters of fossil fuel expansion in our county, to stand with my Oxnard and Camarillo neighbors in support of Food & Water Watch's and Citizens for Responsible Oil and Gas (CFROG)'s appeal of PL14-0103. I urge you to do your duty of prioritizing public and environmental health, including climate stability, over corporate profit by granting this appeal and sending the project back to the planning department.

These new oil wells and oil processing hub will be within 1,600 feet of residents' homes and are within 2 miles of eight (8) Oxnard Schools!

Cornell University Professor of Engineering Anthony Ingraffea, a concrete expert and former researcher for the gas industry who helped develop shale hydraulic fracturing techniques for the Energy Department, notes that 5% of all new wells fail immediately, and that half will fail over a 30 year span! ... allowing methane gas, heavy metals, radioactive materials, and other toxic substances from the hydraulic fracturing process to migrate into underground drinking water sources. A 50% failure rate as an industry standard in a mostly unmonitored, extreme energy extraction process is both irresponsible and dangerous to Ventura County residents. (In 2011, a mere 56 enforcement staff oversaw 54,300 drilling wells and over 29,000 class 2 underground injection wells for drilling waste disposal in California.)

Drilling sites like these produce toxic chemicals which can affect people's reproductive and central nervous systems, as well as ethylbenzene and xylenes which may have devastating respiratory and neurological effects.

In a county prone to severe, sustained drought, hydraulic fracturing uses water that people and farms desperately need. One, single hydrofracking well can produce over a million gallons of unrecoverable wastewater laced with highly corrosive salts, cancer-causing chemicals, and radioactive elements. As published in the International Journal of Human and Ecological Risk Assessment, in a manuscript entitled "Natural Gas Operations from a Public Health Perspective", The Endocrine Disruption Exchange (TEDX) maintains a database of 980 products, including 649 chemicals, used during natural gas operations and investigated for their health effects. 90% of the hydraulic fracturing products used had at least one potential harmful health effect. 47% of the products contain one or more chemicals that interfere with the endocrine system (a finely balanced system of glands and hormones that regulate vital body functions like growth, stress response, sexual development and behavior, insulin production and use, metabolic rates, intelligence, behavior, and reproductive ability). Because it operates at extremely low hormone concentrations, the endocrine system is susceptible to damage from very low levels of chemical exposure, which can negatively impact both organisms and their offspring, including humans. Of 362 chemicals positively identified, 78% can affect the skin, eye or sensory organs, respiratory and gastrointestinal systems,

or liver; and 55% can harm the brain and nervous system. The associated health effects likely to appear immediately or soon after exposure include symptoms such as burning eyes, rashes, coughs, sore throats, asthma-like effects, nausea, vomiting, headaches, dizziness, tremors, and convulsions. Between 22% and 47% of the chemicals are also associated with possible longer-term health effects that can appear months or years later, including cancer, organ damage, and harm to the endocrine system. 48% of the chemicals can have other health effects including changes in weight, teeth or bones and, most often, death. TEDX noted that many of the chemicals have multiple health effects. When categorized by the pathway that led to exposure, TEDX found that 210 of the chemicals (58%) are water soluble while 131 chemicals (36%) are volatile (ie: can become airborne). Of the volatile chemicals, over 93% can harm the eyes, skin, sensory organs, respiratory tract, gastrointestinal tract or liver; 86% can harm the brain and nervous system; 72% can harm the cardiovascular system and blood; and 66% can harm the kidneys. Moreover, because they can be inhaled, swallowed, and absorbed through the skin, the potential for exposure to volatile chemicals is greater than that for exposure to soluble chemicals.

In addition to the above-noted chemicals added to hydraulic fracturing fluids, numerous volatile, naturally occurring, toxic chemicals found underground may also be released during the fracturing process.

In spite of these considerable public health risks, the oil and gas industry is allowed to inject known hazardous materials directly into or adjacent to underground drinking water supplies, absent regulatory supervision from the EPA, and without either the obligation nor the methodology to safely dispose of the wastewater which they produce. Not surprisingly, Professor Ingraffea believes safe hydraulic fracturing is simply a myth, and advises, "Where shale gas development has not yet occurred, ban it. Period. Where it is occurring, enact ironclad regulations, inspect for compliance with them with dogged diligence, and enforce them relentlessly with fines that really mean something."

If we want to protect Ventura County neighborhoods, families and children, we must act BEFORE our public water supplies become laced with hazardous chemicals ... because the health and environmental damage resulting from hydraulic fracturing is life-threatening and often irreparable.

If you are seriously considering approval of this project, which I would urge you not to do, you must FIRST require a full and complete public health impact analysis that is site specific, with directions to specifically consider environmental justice issues, because this project is located within a state-identified disadvantaged community.

The impacted community already suffers from years of pollution from pesticides and the oil industry, which has contributed to asthma rates above the 90 percentile!

The proposed processing facility will also flare more natural gas, emitting additional air pollution and greenhouse gases. Research has shown that over 20 years, one pound of methane (the main component of natural gas) traps as much heat as 72 pounds of CO<sub>2</sub>! One hundred years after its release into the atmosphere unburned (from the hydraulic fracturing process as well as from pipeline, compressor and processing unit leakage) methane remains 25 times more potent than CO<sub>2</sub>. "When burned, natural gas emits half the CO<sub>2</sub> of coal but," Ingraffea cautions, "methane leakage eviscerates this advantage because of its heat-trapping power." The National Oceanic and Atmospheric Administration has measured leakage rates of up to 17% at hydraulic fracturing fields in California, Colorado and Utah; though the National Center for Atmospheric Research has warned that leaks above a mere 2% are sufficient to eliminate any climate advantage of gas over coal. Thus, as a biologist, it is clear to me that methane leaks must be stopped ... and quickly ... if humanity is to have any hope of stalling the most dangerous consequences of global warming and climate

destabilization.

In addition, a significant number of trucks will be required to transport crude oil. These trucks will be using the same routes as many of the local families and their childrens' school buses use on a daily basis ... creating even more intolerable levels of air pollution and health contaminants.

Residents deserve the right to full disclosure about how the expansion of the Cabrillo Oil Field to an approved total of 20 oil wells and a large oil, water, and gas processing hub will affect the health of their families thirty more years into the future BEFORE this project is decided!

Moreover, this past October's Northern California conflagration and the holiday wildfires that stretched across Southern California from Santa Barbara to San Diego traumatized our neighbors and should have made it clear that our collective sense of safety is smoldering along with our homes, given the new-normal year-round fire season that we all fear we must now expect on an annual basis. As California broke records for acres of land burned across our state, all of us must now recognize that NONE of our communities, urban or rural, are safe from flaming embers in hurricane-force winds ... just as coastal states must come to grips with the threats of super-destructive hurricanes, rising seas and storm surges ... and inland states must dread the catastrophic consequences of drought and extreme heat.

Our collective national bill just for last year's wildfire damage exceeded \$10 billion, and the future threat to property and life from Climate Destabilization is growing. Once large areas burn, they release carbon that feeds more warming. Clean, renewable energy offers a far less costly and tragic alternative to the polluting fossil fuels that are destroying the delicate ecological balance of this planet that we are all dependent on not only for survival but for our quality of life. FEMA estimates that each dollar invested in disaster mitigation saves four dollars in rebuilding after-the-fact. Ending our reliance on oil and natural gas is a pressing and essential part of that mitigation.

Our county's, our state's, our nation's and the world's long-term prospects and future economic vitality will be far better served by channeling our resources to the aggressive development of clean, renewable energy, rather than furthering our addiction to fossil fuels by drilling for oil and natural gas in increasingly dangerous processes at the expense of our environment, public health and climate.

All of us, especially people like you, who sit on the County Board of Supervisors and in other positions of power, must immediately take the following three actions:

- 1) Commit to converting Ventura County to 100 percent renewable energy now.
- 2) Work diligently to keep ALL remaining fossil fuels in the ground and build NO new fossil fuel infrastructure.
- 3) Understand that natural gas could be the most dangerous fossil fuel of all. It is not a bridge fuel but rather a gangplank to increased warming and disaster.

Every day that we pretend that increasingly frequent extreme weather events are unrelated to our burning of fossil fuels is another day that people lose their health, lose their homes, lose their livelihoods, lose their sense of security and hope, and even die. This unfathomable and recurrent destruction is unnecessary and immoral.

It's time to put ALL of our energy investments in clean, limitless, non-polluting, renewable energy and stop allowing the petrochemical industry to dictate county policy while it destroys our health,

our lives, & our planet.

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

Rose Ann Witt

**Subject:** Solar powered Oxnard is polluted by AG and Oil

Dear Mr. Foy,

I support CFROG's ( Food & Water Watch's and Citizens for Responsible Oil and Gas) appeal of PL14-0103 and ask you to put public health before corporate profit by granting the appeal and sending the project back to the planning department.

Oxnard deserves a full, complete, and specific public health impact analysis to assess environmental safety in their state- identified disadvantaged community.

These new oil wells and processing hub will

- \* be within 1,600 ft of residences and 2 miles of 8 Oxnard Schools
- \* which has already asthma rates above the 90 %!
- \* oil sites affect reproductive and central nervous systems; create respiratory and neurological effects.
- \*Oil transport trucks will use the same routes as residents and school buses.

I urge you to protect the Oxnard community by further studying the cumulative impacts of these wells before granting permits that will impact the area for decades to come.

Sincerely,

Lauren Simone
