Subject: Support temporary ban on drilling and need for environmental impact study

Dear Steve Bennett,

My husband and I are residents and home owners in Camarillo and support a ban on drilling 79 new tar sands wells near Camarillo airport.

I urge you to work to stop this project and to get an environmental impact study underway to assess the impact of high-pressure, high temperature drilling process on our aquifers.

I'm sorry we cannot attend your meeting this afternoon, but please count on our support for this all important environmental impact study.

Thank you for your attention to this matter.

Sincerely,

Frances and Richard Bohn
