Subject: CRC PL13-0150

Dear Commissioners,

The Ventura Sierra Club serving western Ventura County respectfully requests that you deny permit PL13-0150 (CRC) to drill 19 new oil wells in the fragile Upper Santa Paula Creek region. These proposed new wells will impact the upper Santa Paula Creek Watershed and Santa Paula Creek itself. Santa Paula Creek is home to federally protected steelhead trout. The proposed well drilling pads are within know endangered California Condor habitat.

These along with other negative environmental impacts are more than enough reason to deny this project because of the potential for major harm to be done to a fragile ecological region of our county.

Thank you,

Elisabeth Lamar, Chair

Ventura Sierra Club
