Supervisors,

I object to the proposed legislation adding Section 7253 to Division 7, Chapter 1, of the Ventura County Ordinance Code. The proposed legislation fails to address the hazardous environmental conditions that currently exist. Additionally, the proposed legislation fails to provide any future measures to mitigate the ongoing environmental degradation of the Ventura River and surrounding watershed.

I object to your finding that the adoption of the ordinance is categorically exempt from the California Environmental Quality Act and an appeal to this finding will be filed with the appropriate state agencies.

Henry Babcock
Ventura County
