Subject: November 10 Legacy Permit Amendments

CAUTION: If this email looks suspicious, DO NOT click. Forward to Spam.Manager@ventura.org

Dear Ventura County Clerk of the Board,

I urge you to reject amendments to the coastal and non-coastal zoning ordinances. The proposed amendments will shut down an industry that provides more than 2,000 high paying jobs for working families in Ventura County and with it, millions in tax revenue.

The move to require discretionary review of legacy conditional use permits is part of a collaborative effort by some Board members to shut down all oil and natural gas operations in Ventura County and can open the County to expensive lawsuits that we cannot afford right now.

Supporters of such shutdowns often claim that oil and gas workers can simply transition to jobs in the green energy sector. According to a recent report released by the State Building and Construction Trades Council this is simply not true and in fact, green jobs in Ventura County, as defined by the U.S. Bureau of Labor Statistics, paid on average 35 percent less than oil and gas jobs.

In addition, oil and gas companies in Ventura County operate under the strictest environmental regulations in the world. Responsible oil and gas production must be part of the equation for affordable, reliable and equitable energy policies.

Please support our local workforce, our economy, royalty owners, and an affordable and reliable energy supply for all Venturans. I urge you to reject this new harmful and costly policy.

Regards,
Patricia Beltran

VIA EMAIL TO: ClerkoftheBoard@ventura.org
SUBJECT: November 10 Legacy Permit Amendments

Honorable Supervisors,

I urge you to reject the amendments to the coastal and non-coastal zoning ordinances before you today. The proposed amendments will hurt my job and the industry that affords me the opportunity to live and work in Ventura County. Oil and gas employees and contractors work every day to ensure our community and state at large has a safe, affordable and reliable energy supply.

The move to require discretionary review of legacy CUPs is part of a concerted effort by some Board members to shut down all oil and natural gas operations in Ventura County and with it thousands of jobs and lost tax revenue.

Proponents of such shutdowns often claim that job losses in the oil and natural gas industry are acceptable because oil and gas workers can simply find jobs in green energy. The truth is that green jobs in California pay less than oil and gas jobs, and a great majority of green energy infrastructure is produced out of state. According to a recent report released by the State Building and Construction Trades Council, green jobs in Ventura County, as defined by the U.S. Bureau of Labor Statistics, paid on average 35 percent less than oil and gas jobs. A forced career change to a job that pays less is simply not acceptable.

Our companies operate under the strictest environmental regulations in the world. We all share a commitment to clean air and water in our community. Responsible oil and gas production must be part of the equation for affordable, reliable and equitable energy policies.

Please support our local workforce, local economy, and the energy needs of today. I urge you to reject this radical and unnecessary policy change.

Subject: Legacy permits and vested rights

Hello,
My name is Thomas Crane, I have mineral rights in Ventura that produce income that is necessary to our family. It has come to my attention that the board of supervisors wants to change the policy for legacy permits and vested rights. I am opposed to this change as it will create costly, time consuming issues that would ultimately shut down oil and gas operations, and deprive us of this necessary income.
Sincerely,

Thomas Crane

To: ClerkoftheBoard
Subject: American Veterans, aka AMVETS, Dept of CA jobs matter.

To: clerkoftheboard@ventura.org
Subject: Legacy permits and vested rights
Commissioners,

As the Legislative Commander, of AMVETS, Dept of CA, representing the voice of our 9K Membership am writing you to express the opposition to changing the approval process for oil and natural gas legacy permits from ministerial review to discretionary approval by the Board. The local oil and natural gas industry supports more than 2,000 high paying jobs for working families, **including veterans**. By jeopardizing these jobs, you would be taking away important jobs that California Veterans and their families rely on.

The move to require discretionary review of legacy conditional use permits is nothing but a power grab by some members of the Board of Supervisors. In addition, infringing on vested rights is unlawful and opens the County to expensive lawsuits. It is irresponsible for Ventura County to proceed with yet another policy that exposes it to lawsuits the County cannot afford right now. In addition to the County's economic instability due to COVID-19, if we don't produce energy locally, we are forced to import more of it from countries that don't hire Californians, pay California taxes or apply our stringent safety, labor, and environmental standards. Our veterans have proudly served and fought for this Country and find it absolutely abhorrent that local policy makers are pushing policies that would make us even more dependent on foreign oil resources, it will effect more of the jobs and lives of our native California Veterans settled for work in your county. . With that, We urge you to NOT to move forward with this new harmful policy.

Sincerely,
LT Justin

Ventura County Board of Supervisors

Honorable Supervisors,

I urge you to reject the amendments to the coastal and non-coastal zoning ordinances before you today. The proposed amendments will hurt my job and the industry that affords me the opportunity to live and work in Ventura County. Oil and gas employees and contractors work every day to ensure our community and state at large has a safe, affordable and reliable energy supply.

The move to require discretionary review of legacy CUPs is part of a concerted effort by some Board members to shut down all oil and natural gas operations in Ventura County and with-it thousands of jobs and lost tax revenue.

Proponents of such shutdowns often claim that job losses in the oil and natural gas industry are acceptable because oil and gas workers can simply find jobs in green energy. The truth is that green jobs in California pay less than oil and gas jobs, and a great majority of green energy infrastructure is produced out of state. According to a recent report released by the State Building and Construction Trades Council, green jobs in Ventura County, as defined by the U.S. Bureau of Labor Statistics, paid on average 35 percent less than oil and gas jobs. A forced career change to a job that pays less is simply not acceptable.

Our companies operate under the strictest environmental regulations in the world. We all share a commitment to clean air and water in our community. Responsible oil and gas production must be part of the equation for affordable, reliable and equitable energy policies.

Please support our local workforce, local economy, and the energy needs of today. I urge you to reject this radical and unnecessary policy change.

SUBJECT: November 10th Legacy Permit Amendments

Honorable Supervisors,

I urge you to reject the amendments to the coastal and non-coastal zoning ordinances. The proposed amendments will negatively impact my job and the industry that affords me the opportunity to live and work in Ventura County. Oil and gas employees and contractors work every day to ensure our community and state at large has a safe, affordable, and reliable energy supply.

My company (Aera Energy) operates under the strictest environmental regulations in the world. In fact, we are regulated by over 25 federal, state, and local regulatory agencies. I should know as my job entails ensuring that we comply with all those regulations and associated permit conditions.

The move to require discretionary review of legacy CUPs is part of a concerted effort by some Board members to add another layer of duplicative oversight which will lead to the shutdown of all oil and natural gas operations in Ventura County and with it thousands of jobs and lost tax revenue.

We all share a commitment to clean air and water in our community. Responsible oil and gas production must be part of the equation for affordable, reliable and equitable energy policies.

Please support our local workforce, local economy, and the energy needs of today. I urge you to reject this radical and unnecessary policy change.

Sincerely,

Christopher Logan

Dear Ventura County Clerk of the Board,

I urge you to reject amendments to the coastal and non-coastal zoning ordinances. The proposed amendments will shut down an industry that provides more than 2,000 high paying jobs for working families in Ventura County and with it, millions in tax revenue.

The move to require discretionary review of legacy conditional use permits is part of a collaborative effort by some Board members to shut down all oil and natural gas operations in Ventura County and can open the County to expensive lawsuits that we cannot afford right now.

Supporters of such shutdowns often claim that oil and gas workers can simply transition to jobs in the green energy sector. According to a recent report released by the State Building and Construction Trades Council this is simply not true and in fact, green jobs in Ventura County, as defined by the U.S. Bureau of Labor Statistics, paid on average 35 percent less than oil and gas jobs.

In addition, oil and gas companies in Ventura County operate under the strictest environmental regulations in the world. Responsible oil and gas production must be part of the equation for affordable, reliable and equitable energy policies.

Please support our local workforce, our economy, royalty owners, and an affordable and reliable energy supply for all Venturans. I urge you to reject this new harmful and costly policy.

Regards,
Kathleen Manos
