Subject: Concerned Mineral Owners of California, National Association of Royalty Owners

To the Ventura County Board of Supervisors

I am a concerned mineral owner and I am really worried that you would consider shutting down the local oil and natural gas production.

I am 83 years old widow woman and depend on the oil rights for an retirement supplement income.

My husband and I worked all our lives so we could retire and still live in Ventura County, CA. With all the other things, such as taxes, food, rent, medical going up it is hard for me to stay in here.

I do hope that you will reconsider shutting down the oil production in Ventura County, with all the revenue that the oil brings into the county. I do believe that it would be to the benefit of the County to continue to keep the industry in operation.
