Dear Ventura County Supervisors,

I urge you to amend the County's Zoning Ordinances to ensure better oversight over new oil wells and facilities.

I understand that in Ventura County, many oil wells operate under permits issued decades ago, and more continue to be drilled without an evaluation of environmental and public health impacts.

All new wells in our County should abide by updated standards that place reasonable limits on the number of wells, the permitted time of operation, and that require an evaluation of impacts on public health and the environment.

Please vote to amend the Zoning Ordinance to ensure that all wells and facilities, regardless of when the permits were issued, are subject to environmental review and public notice and hearings.

Regards,  
Pamela Holley-Wilcox
