Supervisors,

We have been informed that on November 10, 2020 you are considering a change that may negatively impact our oil interests. This change may cause our interest to go negative and ultimately shut down Oil production in this area. This action, I believe to be in the wrong direction. Our Family has endured a significant economic downturn due primarily to COVID-19 and are dependent on our Oil interest to make our monthly obligations.

I encourage you to take no action on this zoning ordinance change at this time.

Thomas C. Mangum
