Subject: Public Comments, Agenda Item #47

Dear Supervisors,

Concerning Agenda Item # 47, I am asking for Ventura County to require new permits and full compliance with current health, safety and environmental standards for all new drilling and expanded extraction.

Oil and gas operations in Ventura County need be held to modern standards. Please, recognize the potential consequences if we continue to expand oil operations indefinitely under antiquated Conditional Use Permits. These permits were handed out decades ago, before we had an understanding of the public health, safety, and climate impacts of oil production. There is a global climate crisis and our local communities can't afford the risk of pollution that will impact our environment and health. Oil companies need to be held to the same rules that everyone else needs to follow to protect our land, water, air, and climate.

Thank you for the consideration.

Sincerely,
Bonnie Clarfield-Bylin
