Subject: Revamping Coastal and Non-Costal Zoning Ordinances

I recently was made aware of an attempt to change the zoning ordinances. As I understand this will require additional analysis by the Planning Division and various county departments and agencies plus a public hearing. These additional analysis will only be costly and time-consuming to a process which is already has an efficient review process. Though, I am a small investor, approval of this proposal will have a negative consequence on my income indefinitely. I want you to be aware how revamping the Coastal and Non-Costal Zoning Ordinances will effect local residents. Please reconsider this change.
