Subject: Oil and Gas in Ventura County - READ IN MEETING

To VC Supervisors:

The environmental conditions of this county are being degraded by the current rules governing oil and gas operations. All oil and gas operations in Ventura County should be held to modern safety and environmental standards. We can't continue to expand oil operations indefinitely under antiquated Conditional Use Permits. These permits were handed out decades ago, before our current understanding of the public health, safety, and climate impacts of oil production.

All new drilling and expanded extraction should require a new permit and full compliance with current health, safety and environmental standards. Thank you for helping to make that happen today.

Diana
