**To:** ClerkoftheBoard  
**Subject:** Request to permit and regulate new and expanded drilling and extraction of fossil fuels

Due to the existential threat of climate change and multiple instances of environmental contamination from fracking wells, all oil and gas operations in Ventura County should be held to modern safety and environmental standards. We can't continue to expand oil operations indefinitely under antiquated Conditional Use Permits. These permits were handed out decades ago, before our current understanding of the public health, safety, and climate impacts of oil production.

We must ensure that our land, air and water are kept safe for the public.

All new drilling and expanded extraction should require a new permit and full compliance with current health, safety and environmental standards. Thank you for helping to make that happen today.

Sincerely,  
Jeannie Chari
