Subject: Read in Meeting - Please Protect Ventura County from unregulated expansion of oil development

Dear VC Board of Supervisors,

I believe all oil and gas operations in Ventura County should be held to modern safety and environmental standards. Please do not continue to expand oil operations indefinitely under antiquated Conditional Use Permits. These permits were handed out decades ago, before our current understanding of the public health, safety, and climate impacts of oil production.

With the climate crisis and the current pollution in our communities, we can't accept that any person or corporation has an unlimited right to expand in ways that pollute our land, air, or water without due process and review.

All new drilling and expanded extraction should require a new permit and full compliance with current health, safety and environmental standards.

Thank you sincerely for helping to make that happen at this meeting right now!

Sincerely,

Concerned Citizen, Kim Dawson
