Ventura County Board of Supervisors,

My family is against changing zoning ordinances which would change the operating permit policies that allows CRC to produce oil and natural gas in the county. My 89 year old mother has a very limited income and barely survives on what she gets. I understand this change could take a long time to push through. During that time oil and mineral recipients may not receive or receive less than they are now indefinitely. There is enough hardship going around now with the pandemic . This is not the time to mess with peoples income that depend on it.

Thank you,
