**Subject:** All new Oil Drilling/. Nov. 10th Meeting Agenda

I am concerned about the impacts of oil and gas extraction in Ventura County. It is my belief that all new drilling and extraction should require new permits. Further, companies doing this drilling should be held to the highest current health, safety and environment standards. We all need to be concerned with the impacts of this drilling for the future of clean air and water for all the people of this county.

Thank You,  
Rev. Ronald G. Dybvig
