Subject: Require fracking permits for oilfield expansions, please!

Oilfield permits issued several decades ago and long before the public health, safety, and climate impacts of oil production were understood, require us to be more cautious about expanding oilfields in the future. Existing oil and gas operations in Ventura County must be held to stricter environmental and safety standards. Our county cannot continue to expand oil operations under antiquated Conditional Use Permits into the future without dire consequences.

With the climate crisis and pollution impacting our communities, no corporation or person has a right to expand in ways that pollute our land, air, or water indefinitely. Please require new permits and full compliance with current health, safety and environmental standards for all new drilling and expanded extraction. I appreciate your consideration of my point of view for our county, community and future generations. Thank you!

Sincerely,

Roslyn Scheuerman
