**Subject:** Protect Ventura land

Hello,

I am a concerned citizen and have been in this area all my life. I want to voice that I feel we should not expand oil/gas operations in Ventura County. I understand that Ventura County is operating with very old Conditional Use Permits and we should not be continuing, let alone expanding oil operations. I know that oil companies line the pockets of those in various offices across the land and we concerned citizens can only use our voice and vote. Please take it seriously that the climate crisis and pollution in our communities is real and as a community we need to preserve and protect our land, air, water, and our home.

Although I would wish for no new drilling and expanded extraction but if decided to go forward on something like that, it should require a new permit and full compliance with current health, safety and environmental standards.

Thank you for helping Ventura County remain a wonderful place to live and please make this a priority.

Sincerely,

Sheryl Westrich
