Subject: Conditional Use Permits must GO!

All oil and gas operations in Ventura County should be held to modern safety and environmental standards. Duh! We want our environment and our health to be protected!

Everyone should play by the same land use rules. Why shouldn't old, outdated land use agreements be updated or replaced to protect our climate, health and safe living space?

All new drilling and expanded fossil fuel extraction should require a new permit and full compliance with current health, safety and environmental standards. Thank you for helping to make that happen today.

Sincerely,
