Subject: updating Antiquated Conditional Use Permits PLEASE READ OUT LOUD

BOARD OF SUPERVISORS

Please follow the recommendations of County Staff and the Ventura County Planning Commission in implementing a single uniform permitting and environmental review process for all new oil and gas development. As stated in the July 30, 2020 staff report, these updates would "result in a more consistent decision-making process that is also more protective of public health and environmental resources. The proposed amendment is consistent with the Ventura County General Plan, the Ventura County Coastal Area Plan and the California Coastal Act."

The amendment has been thoroughly researched and supported by the County Council. I heartily support approving this proposal.

Timothy Teague
