Subject: Support for Agenda Item #47: Protect Our Communities and Environment from Antiquated Oil Approval St

CAUTION: If this email looks suspicious, DO NOT click. Forward to Spam.Manager@ventura.org

Dear Ventura County Supervisors,

Without a habitable Earth, what is the point? These are modern times and the science is there, drilling is not something we can keep doing and especially not in the matter that is trying to be done here. We have to think about future generations and the beautiful outdoors and ecosystem we must protect. This planet is not here for us to destroy and do ill as we please. We are only temporary inhabitants and we must protect the land from further destruction. We must not move backwards.

Therefore, I'm writing in support of efforts to amend the County's Zoning Ordinances so that your Planning Division and the public will have better oversight over new oil wells and facilities.

In Ventura County, thousands of oil wells operate under antiquated permits, and more continue to be drilled without an evaluation of environmental impacts and little to no consideration of nearby natural resources and communities. Antiquated permits present a grave risk to the environment, our climate, precious water supplies, and public health.

All new wells in Ventura County should abide by the same modern standards. Oil companies must not be allowed to drill an unlimited number of wells, for an unlimited amount of time, and without an evaluation of impacts on public health and the environment.

Please vote to amend the Zoning Ordinance to ensure that new wells and facilities under antiquated permits are subject to environmental review and public notice and hearings.

Regards,
Anna Flores

Ventura, CA 93004
