Subject: WE must wean ourselves sooner

Please come up with a plan to wean ourselves from our oil dependency.

A shift needs to start today. Our planet is screaming for a change. Soon we will be screaming louder than we are now.

We are exhausting this natural resource and need to stop the extraction of earths natural lubricant that is essential for the earth to have for itself.

Until we have used our great storage of oil that is waiting to be used, we do not need to continue with this amount of extraction. Green energy is our replacement so train the existing laborers so this transition is quick, seamless and painless.

Do the right thing
