I would like to ask the Board of Supervisors to consider the overall impacts of amendments to zoning ordinances, specifically legacy permits. This will not only affect the energy industry. It will have an impact on any business considering investing in Ventura County. If the Board approves the zoning amendment, it would send a message that the Ventura County Board of Supervisors will change the rules in the middle of the game for ANYONE.

I wonder how the investors of the battery storage project in El Rio would feel if the Board changed its mind on that project two or three years down the line.

Please consider all the potential impacts of your decision.
