Dear Board of Supervisors,

I am sending this email today to thank you on the fact that you have finally decided to take initiative and translated the 2040 General plan. However, as much help as this can promise towards our spanish speaking communities, the plan has already been passed and (at the very least) this is insulting to the community. I believe this should have been done way sooner as not everyone speaks english and should have been something to think about. It is extremely unacceptable that a whole group of people were forgotten about and shall not go unnoticed. If i may point out, So I hope a good explanation is in order, to explain the level of disregard towards the communities you were meant to "help."

Sincerely,

Marcos Vargas
