Subject: Agenda # 8 Read aloud at meeting

To Ventura County Board Members:

I strongly oppose any coercion to make a medical decision that should be left to the individual and his doctor. I urge the board to adopt a written resolution stating that no proof of vaccination will ever be needed to do anything in Ventura County. To require such proof would directly violate our civil liberties enshrined in the constitution. It would also violate HIPPA and the American Disabilities Act. We will no longer stand idle as our freedoms are trampled in the name of "safety" and will not comply with any "show me your papers" nonsense.
