

I have dear friends that came from China and have told us of the oppression and suppression from the communist government. They're warning is to all of us Americans to not allow a Chinese Credit Score Card based on our actions to take place in America! They escaped so they could be away from Marxists communists' ideology of suppression.

I just moved over a year and a half ago to the Ventura County and I am horrified that you would even consider a vaccine passport.

I have a child that has idiopathic thrombocytopenia purpura which can be caused by a vaccine or severe toxins. We're not sure which one gave it to her. I have severe allergies to the point where I can't take many medications or I could go into anaphylactic shock.

A vaccine passport falls right in the line with Saul Alinsky's Rules for Radicals, Divide and Conquer. Separating people by tribes and to point out people that have been vaccinated or not! I believe this is totally against the Constitution and is criminal.

If somebody asked me have I been vaccinated, I asked them if they had an abortion! It is a HIPAA law to not cross that line of privacy.

I think this is horrifying that even Ventura County would even be considering talking about a vaccine passport.

So I am extremely opposed to anything like that being discussed or considered within Ventura County.

Thank you,
Jackie Padgette-Baird
