Subject: Public Comment Ventura County Board of Supervisors Meeting Agenda Item #8 - Read Aloud at Meeting

Per the US Constitution, the government's role is to protect our rights as Americans. A digital vaccine passport violates many of those rights including privacy, being treated as an equal, and medical choice. We need you to not only cancel the OTHENA contract, but publicly state your opposition to a vaccine passport & make it clear to businesses that they will be held liable for discrimination based on vaccine status.

As a mother of 3 small children, I cannot understand how our state has moved so far away from truth by cancelling school & requiring children to wear masks when this virus has never been a threat to them. It shows me that the government is not listening to any science when making decisions on our behalf. Please wake up to the long-term damage these decisions are having on future generations. A vaccine passport would be a nail in the coffin for our freedoms by giving pharmaceutical companies unlimited power over the American people. One size medicine does not work and is a complete violation of everything that makes us part of a free country. Do not be passive on this issue, make it clear to businesses they may not require any proof of vaccination ever.
