Subject: Public Comment Meeting Agenda #8

I would like to state that I oppose the vaccine passport contract and the allowance of businesses to require showing medical records to enter a business. This is discriminatory against citizens and should not be required for people to be able to get essential items for themselves and others. I demand that the board cancel the contract and cancel the local health emergency. Our country is not in a state of emergency and to require proof of vaccination would be saying that our communities health is currently in a dire state. Also to require unvaccinated persons to wear masks is also a violation of medical privacy and discriminatory. We are setting up another double standard of hypocrisy to require access to facilities only if vaccinated or masked. This is unconstitutional, unethical, immoral, and the beginning of tyranny in an otherwise free society. There are many arguments to oppose this. Too many to list here, but as a citizen and patron of these local businesses I would again demand that the Othena contract, which was unlawfully approved, be not instated in our county. California Codes 12926 and 37100 are being violated as well as Civil Code 51. Lastly, California Health and Safety Code 101080 does not apply in our current state of county health. There is no emergency status in our county. This act of allowing private businesses to require proof of vaccination or remain masked is unlawful coercion and a violation of privacy, personal rights and so much more.
