Subject: For May 18 Board Meeting, RE: DIGITAL VACCINE PASSPORT PLAN

I am writing to indicate my strong opposition to any law and/or regulation that creates or encourages any type of vaccine-verification system in order for citizens to access public and private services and spaces. This is an outrageous and dangerous assault on healthcare freedom, privacy, and the concept of equal citizenship. The Board should be ASHAMED of itself for even considering such a coercive, immoral, and likely ILLEGAL act which would create an apartheid society in which one group is treated as "less human" than another group. This Covid hysteria has been dripping with dishonesty from the get-go, when we were told "15 days to flatten the curve". Here we are 15 MONTHS later and all ACTUAL evidence indicates that nearly 100% of the populace has very little to fear from this virus, which (even including those with pre-existing, serious co-morbidities and other high-risk populations like the extremely elderly) has a nearly-100% survival rate. The devastation wrought by lockdowns and unfounded fear-mongering has been nothing short of CRIMINAL. The impact this has had and is having on children (the group who should be LEAST afraid of Covid) is downright EVIL and those in authority who've been a party to it need to take an honest, sober look in the mirror and contemplate what they've done. Haven't you done enough damage? STOP THIS INSANITY.
