**Subject:** Vaccine passport

I wish to state my sincere opposition to the proposal to require vaccine passports. I expect my county to be protecting my health, security and privacy. This would be a complete break in that trust. It is an abuse of governmental power.

The vaccines are not proven safe enough, the virus is not proven dangerous enough for citizens to give up their freedoms. I know way too many people personally who have suffered severe side effects from the vaccines, some permanent yet they are afraid or ashamed to report it. That is horrendous!

History has proved over and over again in our country and others that once freedoms are taken away for some excuse, when the threat is gone, those freedoms are very seldom returned.

Please refuse to pass this.

Thank you for hearing me out.
