**Subject:** NO on Vaccine Passports

To Whom it May Concern,

I am writing today to respectfully ask that you vote against any kind of vaccine documentation here in Ventura County. Medical decisions are between an individual and their doctor. IF someone is unable or unwilling to be injected with any substance, vaccine or otherwise, should not we as Americans be allowed to make those personal decisions? Or does my body, my choice only apply in certain situations? Furthermore, have we not learned anything from history? Anytime documentation of this kind is issued by a government it has led to some of the most horrific moments in human history. To require that individuals show private medical information to any agency is a violation of my rights as an American. Please do not allow this in our County!

If vaccine passports are required at any institutions here in Ventura it will most likely result in yet another significant group of your responsible, law abiding, and tax paying citizens to flee to another state that will respect their individual rights to make their own personal medical choices.

Sincerely,  
Katie Shook
