I've heard you are considering vaccine passports for our county. I'm completely horrified that our supervisors are a group of fascist, Marxist dictators. You work for US!!! Don't forget that. Don't pretend that you care about the citizenry and our health, you power hungry, anti democracy hypocrites. This is one of the most wonderful counties in our state, no thanks to you!! Before you were born wonderful, hard working, freedom loving people settled here and made what we have today. Vaccine passports will be financial suicide as well as a huge over reach of government, that's you, right and you work FOR US you don't control us!!! As much as you would like to. Wake up and do what we require of you not what you think is good for us. Businesses and families will leave, people will fight back and protest, you will be unseated and you will destroy our wonderful county. Just an fyi, close to 500,000 people have adverse effects from this vaccine and more than 11,000 people have died worldwide. Some health issues won't show up, for months or years but they will manifest. What happened to "our bodies our choice". You are not our guardians, over lords or caretakers, stop acting like you are. We need less control from governments who think they know what's best for us when all they want is power. You fear monger, you pander and you assume we are stupid. Well think again and stop this Big Brother take over or be ready to see a huge backlash. We pay taxes to pay YOU. Don't forget where you all came from either. Stay humble and do what we want, that's your job.
