**Subject:** Why The Push To Vaccinate The County Residents?

Please distribute a copy of this email to the Board of Supervisors at the meeting on 05-18-2021.

Distinguished Members of the Ventura County Board of Supervisors,

I am very concerned that the County of Ventura is pressuring the citizens of the county to get the so-called vaccine which is actually an mRNA vaccine or gene therapy depending on the manufacturer of the vaccine. The so-called vaccine does not prevent a person from acquiring the Covid19 virus but lessens the symptoms in 95% of those that become infected with the virus. A virus that had an over 99% survival rate.

There have been over 3,000 reported vaccine injuries to VAERS with experts hypothesizing that the actual number of injuries from the so-called vaccines being as much as a hundred times higher than this because vaccine manufacturers are immune from liability due to the act signed into law by President Reagan in the 1980's making the vaccine manufacturers immune from liability.

Why is the county running ads on the local radio stations and setting up vaccine centers costing taxpayers tens of thousands of dollars when the vaccines do not prevent Covid19 and put thousands of county residents at risk of serious injury or death from the vaccine?

I personally know two people that have been seriously injured from the vaccine and two that have died after receiving the vaccine.

Concerned Citizen,  
Kevin Daly
