Subject: vaccine passports

To Whom it may concern;

I am writing to voice my concern over the idea and implementation of the Covid-19 Vaccine passport. As a citizen of The United States of America, where our freedoms have been fought for and countless lives have been sacrificed to obtain and keep these freedoms, I demand my rights be protected here in this matter. My rights to privacy, freedom of choice, and to assemble are at stake.

Our government should not violate my right to assemble, or privacy by requiring any citizen to show proof of vaccination and reveal private health information just to go about their daily lives

Vaccine passports will attempt to control what I can do, where I can go, and how much the government can know about my activities. These vaccines are still experimental and should not be mandated, or policed.

On equity: some people aren't able to get vaccinated because of medical reasons. Should they be able to have a passport and should their medical exemption have to be listed on the document? If you require people to disclose their health reasons, you start to violate privacy.

This will affect access to jobs, school, commerce, and basic needs for an illness that is soon to have herd immunity.

Another concern; What is the policing of this going to look like and who will be disadvantaged there?

Where does this end? America is not a "show your card" nation.

Review history, look at the science, educate yourself and vote no!

Concerned citizen of our great Nation and of Ventura County,

Sarah Pedersen
