Subject: digital vaccination passport

Dear VC Board of Supervisors,

Let me start off by saying that I am not an anti-vaxxer but I am against discrimination and anything that takes away our constitutional rights as free thinking human beings to determine what is best for bodies. I will take the vaccine if I have no other choice, however, I will not subject my kids to it unless you can provide me evidence that the Covid virus is more harmful to them than other viruses that do not require a vaccine. Here is what has been said about the Covid vaccine and please let me know if these are lies and if so provide evidence to the contrary.

1. The vaccine is effecting menstrual cycles in women,
2. More people that work at the FDA are choosing not to get the vaccine than those that are receiving it.
3. More people have died from the Covid vaccine in the last 4 months than all vaccines combined in 20 years.
4. It changes genetics that may be passed down to offspring if the female is able to continue to be fertile.
5. There has not been studies regarding the long lasting negative effects of the vaccine.

I am not a conspiracy theorist nor do I care about politics. I have a family member that has not had a menstrual cycle in three months following receiving the vaccine. I will pull my kids out of public school and send them to private school or home school them if you think that for one second I will subject my daughters to this non-FDA approved vaccine that even employees of the FDA won't even take. I can't imagine any business in Ventura that would voluntarily deny access to their goods or services if this measure is passed because they would decrease their revenue by 50%. There is a mass exodus out of California primarily because of the poor decisions made by our elected officials and this would be yet another one that will be viewed extremely negatively amongst constituents of both parties. Anyone who wants to get the vaccine should have access to it so that it will protect you from those who would rather take the risk with the virus rather than the experimental vaccine. I want to be on record that I oppose this measure.
