

To BOARD OF SUPERVISORS,

Getting a vaccine is a very personal decision. I am a doctor and seen horrible side effects from this vaccine, and researched over 4,000 deaths! To have a Vaccine Passport, for a COVID Vaccines, which is NOT FDA APPROVED, is forcing people to put their lives at risk! These COVID Vaccines have been approved for emergency use operation and that means NO ONE can be required to get it. Also, many of my patients have had COVID, like my entire family and giving anyone this vaccine with positive antibodies can be life-threatening. We all know this is a political and financial move on your behave and the American people are wise to your radical agenda.

HISTORY VACCINE DEATHS – 2019 VAERS reported 203 deaths, 2018 reported deaths 119, 2007 reported deaths 85. Since Dec 2020 to April 2021 reported deaths for COVID vaccines - 3362 deaths! That's roughly 30 people a day dying from this vaccine! In 4 months we've had more deaths from COVID vaccines than all vaccines in a 15 yr period from 1997 to 2019 plus over 1,000 heart attacks and over 8,000 hospitalizations!

In 2019, over 1.21 million people died of Tuberculosis. This is a contagious infection caused by bacteria that affects the lungs but also many organs. There were no masks required or BCG (Bacille Calmette-Guerin) vaccine required passport. Those that chose to get the COVID vaccine should feel safe with those who have chosen NOT to get it. And once you have the antibodies, you cannot get it or spread it.
